# Table of Contents

1. **Introduction**  
   1.1: MOTIVATION  
   1.2: UNDERNUTRITION FACTS  
      1.2.1: NFHS Findings  
      1.2.2 DLHS Findings  
      1.2.3: NNMB Facts  
      1.2.4: HUNGaMA Facts  
      1.2.5: IHDS Facts  
   1.3: CHILD UNDERNUTRITION IN THE PUBLIC FORUM  
      1.3.1 The Demand for NFHS-4  
      1.3.2 The Food Security Bill  
   1.4: THE GROWTH – NUTRITION DEBATE  
   1.5: CHAPTERIZATION  

2. **Relevant Issues in Child Undernutrition**  
   2.1: INTRODUCTION  
   2.2: CONSEQUENCES OF CHILDHOOD UNDERNUTRITION  
   2.3: MEASUREMENT ISSUES  
      2.3.1: Reference Standards  
      2.3.2: Two Types of Proxies Used  
      2.3.3: Caloric Intake  
      2.3.4: Anthropometric Indicators  
   2.4: THE DATA SOURCES  
      2.4.1: The National Family Health Survey Data  
      2.4.2: The India Human Development Survey Data  
   2.5: CONCLUSION
### 3. The Mean of Squared Deprivation Gaps  

3.1: INTRODUCTION  

3.2: THE LITERATURE ON POVERTY MEASUREMENT  
   3.2.1: Sen’s Measure of Poverty  
   3.2.2: The FGT Measure of Poverty  

3.3: USING THE MSDG TO MEASURE UNDERNUTRITION  
   3.3.1: The Biomedical Context  
   3.3.2: A Composite Measure of Undernutrition  
   3.3.3: Decomposability of the Measure  

3.4: RESULTS AND DISCUSSION  
   3.4.1: Average Rates and MSDG of Child Underweight in States  
   3.4.2: Focus on the Poorest Quintile  

3.5: CONCLUSION  

### 4. Determinants of Child Undernutrition: Public and Private Factors  

4.1: INTRODUCTION  

4.2: LITERATURE REVIEW  
   4.2.1: Theoretical Classification of Literature  
   4.2.2: Econometric Classification of Literature  
   4.2.3: The Factors Commonly Studied in Literature  

4.3: METHOD OF ANALYSIS  
   4.3.1: The Factors Studied  
   4.3.2: The Econometric Technique Used  

4.4: DATA  

4.5: RESULTS AND DISCUSSION  
   4.5.1: Mean-Focused Analysis  
   4.5.2: Distribution-Focused Analysis  
   4.5.3: Effect of the Components of G  

4.6: SUMMARY AND CONCLUSIONS
5. ‘Pure’ or Univariate Nutritional Inequalities

5.1: INTRODUCTION

5.2: ‘PURE’ VERSUS ‘SOCIOECONOMIC’ HEALTH INEQUALITY

5.2.1: Which Inequality is More Consequential?

5.3: COMMON MEASURES OF PURE HEALTH INEQUALITY

5.3.1: Bringing Together the Two

5.3.2: Relation between Average Health and Pure Health Inequality

5.4: INTERQUANTILE REGRESSION

5.5: CONCLUSION

6. Group inequality in Child Nutrition in India

6.1: INTRODUCTION

6.2: THE COMMONLY USED MEASURES OF GROUP INEQUALITY

6.2.1: The Concentration Curve

6.2.2: The Concentration Index

6.2.3: The Extended Concentration Index

6.2.4: The Achievement Index

6.2.5: The Relative Index of Inequality

6.2.6: The Slope Index of Inequality

6.3: CRITICISMS OF THE CONCENTRATION INDEX

6.4: THE MSDG CONCENTRATION INDEX

6.5: RESULTS AND DISCUSSION

6.5.1: The Concentration Indexes

6.6: CONCLUSION

7. The Intersection of Gender, Caste and Class Inequalities

7.1: INTRODUCTION

7.2: LITERATURE REVIEW

7.2.1: The Single-Axis Framework

7.2.2: Intersectionality
