Chapter – 2 LITERATURE REVIEW ON FMRI

2.0 Introduction

2.1 Safety Considerations in fMRI
   2.1.1 Static Magnetic Fields
   2.1.2 Time Varying Magnetic Fields
   2.1.3 Other Safety Considerations

2.2 Comparison of the Functional Brain Imaging Modalities

2.3 Literature Review on Brain Tumors
   2.3.1 Limitations
   2.3.2 Brain cancer Characteristics

2.4 Blind Source Separation Review
   2.4.1 Introduction
   2.4.2 Blind Source Separation (BSS)
   2.4.3 Binaural Casa Systems
   2.4.4 Image Based BSS

2.5 Conclusions

2.6 References

Chapter – 3 BLIND SOURCE SEPARATION (BSS)

3.1 Introduction
   3.1.1 Vector Gradient s
   3.1.2 Matrix Gradient

3.2 Learning Rules for Optimization
   3.2.1 Gradient Descent
   3.2.2 Natural Gradient

3.3 BSS

3.4 Independent Component Analysis (ICA)
   3.4.1 Statistical Independence
   3.4.2 Nongaussian Distribution

3.5 Measures of Nongaussianity
   3.5.1 Kurtosis
3.5.2 Negentropy 44
3.6 Maximum Likelihood Method (ML) 46
  3.6.1 PDF of a Transformed Variable 48
  3.6.2 ML of ICA Model 48
3.7 Frequency Domain Convolutional BSS/ICA 51
  3.7.1 STFT and ISTFT Stage 52
  3.7.2 ICA Stage 54
  3.7.3 Permutation 57
  3.7.4 ICA Based Clustering 58
  3.7.5 Scaling 59
3.8 Conclusions 59
3.9 References 60

Chapter – 4 INTRODUCTION TO fMRI

4.1 The Big Magnet 63
  4.1.1 Experiment Stages 64
4.2 Physiology of the Bold Response 69
  4.2.1 Contrast Generation in Magnetic Resonance Imaging 69
  4.2.2 What Generates Magnetic Field Susceptibility? 70
  4.2.3 What are some common uses of the Procedure? 72
4.3 Blind Source Separation Characteristics 73
  4.3.1 Entropy 73
  4.3.2 Mutual Information 74
  4.3.3 Kullback – Leibler Divergence 75
4.4 Gradient Technique 76
  4.4.1 Gradient Descent Method 76
  4.4.2 Maximum Entropy Method 76
4.5 BSS by Mutual Information 80
4.6 Determination of the Differential Entropy h(y) 80
  4.6.1 Determination of the Marginal Entropy h(Y_i) 81
4.7 Results 84
4.8 Sparse Decomposition and BSS Problem 86
Chapter – 5 fMRI IMAGE ANALYSIS WITH BSS

5.1 Introduction

5.2 Introduction to fMRI

5.2.1 What is fMRI

5.2.2 Future role in understanding the Physiological basis for Cognitive and Perceptual Events

5.1.3 Summary and Future Directions

5.3 BSS Problem for fMRI Dataset

5.4 BSS Solution

5.4.1 The Geometrical Separation Method

5.4.2 Separation Process

5.5 Sparse Representations of Images

5.5.1 Separation Process

5.6 Separation by using the ICA_Newton Algorithm

5.6.1 PCA Algorithm (Principal Component Analysis)

5.6.2 The Analysis of the “ICA_Newton” Algorithm Input Parameters

5.7 Analysis of the fMRI Images

5.7.1 The Sparseness Method of “Wavelet Packet” (WP)

5.7.2 A Comparison between the Gradient operation and the WP operation in order to spares an image

5.7.3 Sparseness Identification Criteria

5.7.4 Simulation of fMRI Data steps

5.8 The Simulation Conduction

5.8.1 The Separation outcome and analysis

5.8.2 Artificial Source Planting

5.9 Conclusions
Chapter – 6 NN BASED BRAIN CANCER DETECTION

6.1 General Description
6.2 Types of Brain Cancers
6.3 Brain Cancer Characteristics
6.4 Brain Cancer Facts
6.5 An approach to Brain Cancer Classification
6.6 The Brain Cancer Database
6.7 Brain Cancer Recognition System
6.8 Early Tumor Detection System
   6.8.1 Image Preprocessing
   6.8.2 Image Segmentation
   6.8.3 Histogram Equalization
   6.8.4 Image Thresholding
   6.8.5 Image Enhancement
   6.8.6 Sharpening Filter
   6.8.7 Dilation
   6.8.8 Feature Extraction
   6.8.9 Texture Features
   6.8.10 Feature Selection
6.9 Implementation
6.10 Conclusions
6.11 References

Chapter – 7 - RESULTS

7.1 Refinement and extension languages with Milling
7.2 Finding the Limits of a Tumor with ASF
7.3 Simon Tumors on T1 and T2
7.4 Description of the stages of the algorithm
   7.4.1 Brain Tumor Detection Method
7.5 Stages of running the Algorithm based in the proposed Set-Up

APPENDIX A – GUI of the Model proposed in the Thesis

APPENDIX B – Representation of Tumor Image using IP Techniques

Chapter – 8 Conclusions and Future Scope
