List of Tables

2.1  Impurity peak positions in Ryd, relative to the Fermi level for various Ag concentrations in AgPd alloys from different methods. .......... 47

4.1  The shape of the segregation profile in Cu-Ni systems obtained by different experimental and theoretical techniques. ............... 94

4.2  Effective Point Interactions in mRyd/atom for various concentrations for CuNi alloys. The values are taken from Dreyssé et.al. (1993) for TB DCA and from Pasturel et.al. (1993) for TBLMTO-GPM. ......................... 102

4.3  Comparison of concentrations in different layers for three different bulk concentrations of Cu-Ni alloys obtained by various methods. The values are taken from Pasturel et.al. (1993) for TBLMTO-GPM, Dreyssé et.al. (1993) for TB-DCA and Good et.al. for ECT ......................... 104

6.1  Values obtained for the quantum percolation threshold $q_Q$ by various methods .... 158
