

ACKNOWLEDGEMENT

It is at this precise juncture that I recount the manifold blessings God has bestowed on me and express my heart-felt thanks to the Almighty.

I express my sincerest gratitude to my teacher Professor D. K. Ganguly, Department of Pure Mathematics, University of Calcutta, for his teaching and untiring guidance and his reliance in me. His constant support at the time of my blues needs special mention. His invaluable help, insightful suggestions, and continuous encouragement not only led me to complete this thesis but shall also enable me to carry out further research in future.

I have a good fortune of receiving serious and sincere help, books and journals from my uncle Professor Ranjan Chowdhury, Department of Computer Science, Eastern Michigan University, USA, my aunt Professor Rita Chattopadhyay, Department of Mathematics, Eastern Michigan University, USA and my cousin Dr. Malabika Basu, University of Dublin, Ireland.

I thankfully and respectfully recall all my teachers for enkindling my interest by sharing their wisdom with me and reposing their confidence on me. It is

also an opportune time to make special mention of Late Professor Sitanshu Banerjee for his help and affection.

I am at a loss as how to thank my parents Smt. Anjana Mitra and Sri Nawal Kishore Mitra for their love, unconditional care and support over the years. I would be failing my duty if I forget to mention my father-in-law, Sri Sushil Kumar Bose and my mother-in-law, Mrs. Gita Bose for their help and co-operation. My wholehearted appreciation also goes to my husband Mr. Sanjay Kumar Basu for his unconditional support, continuous encouragement and constant co-operation. Finally, my unending love to my son Master Rudraroop [Neil] but for his forbearance and understanding my work would not be completed.

Chandrani Mitra
