This thesis is the end of my journey in obtaining my Ph.D. degree. At the end of this journey, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

In the first place I would like to record my gratitude to my guide, Dr. Subrata Sau for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. I am very much thankful to him for his valuable advice, constructive criticism and extensive discussions around my work. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to him more than he knows.

I was funded by the Council of Scientific and Industrial Research (CSIR, fellowship Nos 37/(1194)/04-EMR-II and 09/15(0369)/2009-EMR-I) for five years. Without these fellowships it would have been impossible for me to carry out this research work.

I thank the Director, Bose Institute for providing me a scope to carry out my graduate study in his reputed institute.

My special thanks go to Dr. N. C. Mandal, Ex-Emeritus Professor, Department of Biochemistry, Bose Institute, for his encouragement and valuable advice during my research. I am also thankful to Dr. Mahadeb Pal, Division of Molecular Medicine, Bose Institute, Dr. Tapan Datta, Department of Microbiology, Bose Institute, and Dr. Gopal Chakrabarti, Dr. B. C. Guha Centre for Genetic Engineering and Biotechnology, University of Calcutta, for their suggestions about my work.

Senior scientists at the Department of Biochemistry, Prof. B. Bhattacharyya, Prof. P. Sinha, Prof. P. Chakraborty, Prof. A. Lohia, Prof. R. Chattopadhyay and Prof. P. Parrack were always helpful and caring throughout my days at Bose Institute.

I am thankful to all non-academic staffs of the Department of Biochemistry and other departments including administration and library for their help in each and every need of mine.
I gratefully acknowledge my college teacher Prof. Nandan Bhattacharyya, HOD, Department of Biotechnology, Haldia Institute of Technology, for his inspiration and encouragement which motivated me to take research as a career.

My lab-mates were very much friendly and cooperative with me. My relationship with Parthoda, Tridibda, Malabikadi and Palasda was almost like blood relation. Tridibda was the man who constantly guided me through every obstacle on the bench. I have learnt from him almost every experiment I was required to perform. I feel that he was really good to teach somebody about the fundamentals of the experiments. Parthoda taught me about the aseptic microbiological techniques and “Phage Assay”. Malabikadi and Palasda made my staying at the lab thoroughly enjoyable. Biswanath joined nearly about one and half years after I joined to the laboratory. He stood by my side during the “tough” times of my tenure. He was always very helpful by providing his valuable “TIPS” in my research. Anindya and Amritangshu have joined at the last phase of my research. They ably supported me during the preparation of this thesis. I must not forget about Saikat, a guest worker, who helped me in the bioinformatic analysis regarding my research work.

I deeply mourn the sudden demise of Mr. Sujoy Das, who has presented the pre-Ph.D. seminar along with me on the same day at the Department of Biotechnology, University of Calcutta, due to mishap. May his soul rest in peace.

I should convey my thanks to my hostelmates Anilda, Shushilda, Santanuda, Alokda, Srijhanda, Amitda, Ritamda, Kuntalda, Sukhenduda, Jaydipda, Rajeshda, Tusharda, Bombada, Barunavada, Dipakda, Alida, Amlanda, Subrata, Ayan and Himadri for providing the most needed light atmosphere at the end of the day’s work. I will never forget the surprise birthday party of mine at the hostel organized by them. I really miss the hostel-life very much.

My friends at Bose Institute have enriched my life with memories that I will bear in my heart for the rest of my life. My senior colleagues in the institute including Sabyada, Pabitrada, Koustavda, Snehasisda, Sumitda, Rudrada, Arumoyda, Sankarda, Soumittrada, Souravda, Atanuda, Subhrada, Chandramadi, Dipakda, Prabalda, Lekhadi, Subhankarda, Somenathda, Sujoysda, Subhasda, Debadritadi and also my juniors like Abinit, Avisek, Aditi, Sandipan, Soumananda, Jaspreet, Himadri, Arnab, Boudhyan, Pratik, Anirban, Jayadri, Pijush, Amit, Biva, Tathagata and so on… made my working days, memorable and enjoyable. I will miss the
tea shop of Zakirda in front of the institute where I used to spend some time for a little refreshment.

Peeping her head out of this big crowd, standing apart with phenomenal qualities deserves a big applause. A big praise to some one, who is nearest, dearest & closest to my heart, a trove of intrinsic worth to cherish throughout my life - Dipanwita, my fiancé and my best friend. She has been harboring me with constant support & courage to carry on this daunting task amidst several obstacles, time & again.

Last but not the least, I remember the time of resurrection when I started stepping into the path of success. Nothing succeeds like success; this fabulous saying had eluded me with its ugly twists and turn till I saw a light at the end of the tunnel in the form of my family – my biggest motivator, harshest critic, pillar of strength for vitality, all gelled into one to create a rippling effect on my career, which spiraled upwards henceforth. No words can ever reciprocate my gratitude or replenish the place which my family has taken. Being complacent still, I should not hesitate, plagiarizing the fact that turned every wrong of mine towards a right that I always enjoyed riding upon. My parents, grandmother, sister, jamaibabu along with Rick and Babaji... the most loved asset of my life, relatives & well wishers who had been harnessing my efforts, day in & out to stage a platform I had been coveting for years. It took me years to complete this magnum opus, surpassing all odds amidst turbulent times which had made be susceptible to failure. This is where the pivotal role of my family played the perfect anchor by putting up a stellar performance of this magnitude which sailed me through...

They have been my greatest source of inspiration and I always find myself lucky and proud to be a part of them. I thank you all.
