Preface  i-ii
Acknowledgement  iii-iv
List of Abbreviations  v-vi

Chapter 1: Introduction:

1.1. Inflammatory Bowel Disease and its prevalence
1.2. Major factors involved in Inflammatory Bowel Disease
1.3. Drugs in treatment of Inflammatory Bowel Disease
1.4. Strategies for drug delivery to the colon
1.5. References

Chapter 2: Objective of the Work  32-36

Chapter 3: Materials and Methods  37-57

3.1. Materials
3.2. Methods
   3.2.1. Synthesis of amine functionalized guar gum (GGAA)
   3.2.2. Preparation of colonic drug delivery devices:
           3.2.2.1. Formulation of Prednisolone (PD) Tablets
           3.2.2.2. Preparation of cross-linked guar gum alkyl amine (GGAA) microparticles
           3.2.2.3. Preparation of ursodeoxycholic acid loaded nanoparticles following nanoprecipitation technique
   3.2.3. Generalized Characterization Technique
           3.2.3.1. Guar gum alkyl amine (GGAA)
           3.2.3.2. Fourier Transform Infrared Spectroscopy (FT-IR)
           3.2.3.3. Powder X-Ray diffraction studies (PXRD)
           3.2.3.4. Atomic Force Microscopy (AFM)
           3.2.3.5. Scanning Electron Microscopy (SEM)
           3.2.3.6. Photon Correlation Spectroscopy (PCS)
           3.2.3.7. Differential Scanning Calorimetry (DSC)
           3.2.3.8. Swelling Studies
   3.2.4. Development of analytical method for the estimation of Prednisolone (PD)
   3.2.5. Development of analytical method for the estimation of Glycyrrhizic acid (GA)
3.2.6. Development of analytical method for the estimation of Ursodeoxycholic acid (UDCA)
3.2.7. Validation of the developed analytical methods for the drug substances
3.2.8. In vitro cumulative drug release study
   3.2.8.1. Prednisolone formulation
   3.2.8.2. Glycyrrhizic acid microparticle formulation
   3.2.8.3. Ursodeoxycholic acid nanoparticle formulation
3.2.9. Factorial design and optimization
3.2.10. Animal Model for in vivo experiments
3.2.11. Study of various physiological and biochemical parameters from tissue samples
3.2.12. Statistical Analysis
3.3. References

Chapter 4: Design and evaluation of bi-polymeric matrix delivery device for Prednisolone

4.1. Literature Review
   4.1.1. Pharmacological activities
   4.1.2. Physicochemical properties
   4.1.3. Pharmacokinetics

4.2. Natural and synthetic polymers for drug delivery

4.3. Results and Discussion

4.4. References

Chapter 5: Preparation and evaluation of glycyrrhizic acid loaded guar gum alkyl amine microparticles

5.1. Literature Review
   5.1.1. Historical evidence
   5.1.2. Physicochemical Properties
   5.1.3. Pharmacological Activities
   5.1.4. Pharmacokinetics

5.2. Biodegradable microspheres in drug delivery
5.3. Results and Discussion
5.4. References
Chapter 6: Design and evaluation of Ursodeoxycholic acid nanoparticles for colon specific delivery

6.1. Literature review
   6.1.1 Historical evidence
   6.1.2 Physicochemical Properties
   6.1.3 Pharmacological Activities
   6.1.4 Pharmacokinetics

6.2. Application of nanotechnology in colon targeted drug delivery

6.3. Polymers used in nanoparticular drug delivery

6.4. Results and Discussion

6.5. References

Summary

Annexure I & II
