ACKNOWLEDGEMENTS

First of all, I wish to express my deep sense of gratitude to Dr. K.P. Shrivastava, M.Sc. (Bihar); M.Sc. (Wales); Ph.D. (Surrey); F.Z.S. (London); Bact. Food Sant. (Washington), the Joint Director of Export Inspection Council (Govt. of India) for this inspiring advice and guidance, unfailing interest and constant encouragement throughout the course of his work. I am indebted to late Dr. V.K. Pillai, former Director of the Central Institute of Fisheries Technology (CIFT) and my previous guide for providing necessary laboratory facilities and for his sincere help and able supervision in the beginning of the work. Grateful thanks are also due to Dr. C.C. Panduranga Rao the previous Director and Mr. M.R. Nair, the present Director of CIFT for encouragements, valuable discussions and for providing facilities for the work. My sincere thanks are due to the National Collection of Type Cultures, Central Public Health Laboratory, London; Department of Health, Education and Welfare, Robert A. Taft Sanitary Engineering Centre, Ohio; Dr. R. Sakazaki of the National Institute of Health, Tokyo, Japan;
the Director, King Institute, Guindy, Madras and the Director of the School of Tropical Medicine, Calcutta for sending type cultures for use in the present study. Special thanks are also due to the Director of the National Salmonella and Escherichia Centre, Central Research Institute, Kasauli (India) for serotyping some of the Salmonella strains isolated during the course of this work. Grateful acknowledgement is also made to those Seafood processing factories at Cochin who had provided much appreciated cooperation and assistance. Finally, sincere thanks are due to all my colleagues in the Quality Control Section of CIFT who had extended their cooperation during the course of this work.
