

Acknowledgements

I wish to express my deep and sincere sense of gratitude to Prof. P.C.Kesavan for his constant guidance, constructive criticisms and valuable suggestions which led to the successful completion of this piece of work.

I thank the Dean, School of Life Sciences, for providing me with the necessary experimental facilities.

I also thank the technical staff of C.I.F., School of Life Sciences, for helping in the irradiation of the experimental samples. Thanks are also due to Mr. Saini for his skillful drawings and photographic work.

I am thankful to Tara and Anwar for their excellent technical assistance in carrying out my experiments.

I take this opportunity to thank my friends and colleagues in the laboratory for their help and cooperation. My special thanks to Lata and Kamala for keeping up my spirits during the write-up of this thesis.

I am indebted to my family for their constant encouragement and support.

I gratefully acknowledge the financial assistance from the University Grants Commission, India, in the form of junior and senior research fellowships.
