

CONTENTS

1.	Introduction	1
2.	Materials and Methods	11
3.	Results	20
	I. General	
	II. Effect of test chemicals individually	
	III. Effect of combinations of two chemicals	
	IV. Effect of <i>Chlorella vulgaris</i> , E-25	
4.	Discussion	52
	I. Biological indicators of radiation damage	
	A. Changes at biochemical level	
	B. Changes at cytogenetic level	
	C. Changes at cellular level	
	II. Chemical modification of radiobiological damage	
	A. Radioprotection by vitamins	
	B. Radioprotection by caffeine	
	C. Radioprotection by aminothiols	
	D. Radioprotection by <i>Chlorella vulgaris</i> , E-25	
	III. Assessment of the therapeutic benefits of various 'protectors' in terms of their chemical reactivities	
5.	Summary	85
6.	Bibliography	88
