ACKNOWLEDGEMENT

This work would not have been possible without the ungrudging help and leading counsel of many.

First and foremost I must thank my supervisors Dr. Debasish Bandyopadhyay and Dr. Arun Bandyopadhyay without whose tireless and ever willing help I would never have been able to complete this work. Their guidance shall always remain the lodestar of my life.

Secondly, I acknowledge the receipt of a project fellowship from UPE Scheme of UGC, Govt. of India, under University of Calcutta, and Senior Research Fellowship from CSIR, Govt. of India, without which carrying out this work would have been very difficult.

I would also like to acknowledge the technical assistance provided by Mr. S. Maikap of SAIF (Sophisticated Analytical Instrument facilities), Bose Institute, Rajabazar, Kolkata, Dr. S. Dasgupta, Dept. of Microbiology, Bose Institute, Kankurgachi, Kolkata and Dr. S K Pattari of the RN Tagore International Institute of Cardiac Sciences, Kolkata, India.

I am extremely grateful to Mr. Swapan Mandal, Mr. Prabir Das and Mr. Sumanta Ghoshal, who inspite of being busy found time to render me with their valuable help and support.
No work of this dimension can be completed without the help and support of friends and co-workers. For this study too, I am indebted to many of my co-research scholars, friends, well-wishers and a large number of persons and institutions who encouraged and helped me to complete this work. Without their assistance, this work could not have been completed successfully.

Though it is not possible to name each and every person who was kind enough to extend their helping hands towards completion this work, I must not be forgetful of my indebtedness to them. I acknowledge their help with the sincerest gratitude.

And finally, I must thank my parents for bearing with me and always being there for me through all the ups and downs of my life. Their work is still in progress...

Date: 11/11/2011
