

ABSTRACT

The present research is an effort to check the status of awareness of women towards empowerment. This study also went through the differences between the of perception among women randomly selected from Villages named Dhabla, Thunakalan, Amajhir, Jamonia kalan, and Hirapur in the Sehore District of Madhya Pradesh. Since, education and training always has considered as a strongest weapon to reduce any sort of inequality in welfare of women and their empowerment. Education and training i.e. vocational training are playing vital roles in the same concern. So, the status of education and training has also been analyzed in this research. The collection of data had been done through questionnaire survey. The level of awareness of women for the research checked on four parameters i.e. economic, social, political, and general awareness based on 30 items. Study have gone across the tools and techniques used by government to empower women in the study area. Data has been analyzed through reliability test, factor analysis, cronbach's alpha, mean, standard deviation and t-test. Thus on the basis of outcomes, low level of awareness has been obtained .It has been found government has introduced several schemes for women welfare. Still awareness level observed low. Status of education and training were not praiseworthy. Study suggested to pay due attention over schools to improve enrollment no of girl students. Vocational training and workshop ought to be organized in the area to elevating women's standard.
