Acknowledgement

I am immensely pleased to put on record my profound gratitude and heartfelt thanks to my teacher and thesis supervisor Prof. Kamal Bhattacharyya for enlightening me with the first glance of research. As an advisor, he gave me the freedom to explore on my own but was always there to pull through when my steps falter. He taught how to question thoughts and express ideas and was always there to clarify doubts at each stage as the work progressed. His insightful criticism, flawless grammatical editing, patiently going through and commenting on countless revision of the manuscript were beyond any evaluation. Without his steadfast support, this thesis could not have seen the light of the day. I just cannot thank him enough for this wonderful journey.

A fellowship from Council of Scientific and Industrial research (CSIR) and every kind of research assistance from the Physical Chemistry Section of the University of Calcutta is thankfully acknowledged.

I do also thank the Head of the department, all other esteemed teachers, and my research scholar friends in the Department of Chemistry, University of Calcutta, for their timely help and association.

I would also like to express my gratefulness to my family for their love and encouragement and most of all, my husband, whose patience and faithful support throughout the training period was so very needed and appreciated.

Anyone missed in this acknowledgement is also thanked.
