ACKNOWLEDGEMENT

I would like to express my deep sense of gratitude to my mentors Dr. Sumit Homechaudhuri, Professor, Department of Zoology and Dr. Abhijit Mitra, Associate Professor, Department of Marine Science, University of Calcutta for their valuable guidance, trust, encouragement and help throughout the research programme. I am also indebted to other teachers of Department of Zoology and Department of Marine Science, University of Calcutta who also helped me much with their valuable advice and suggestions. It will be a matter of great omission, if I do not remember here my former teachers, who by their constant encouragement and inspiring words helped me to the door of highest learning.

I am really obliged to all the staffs of the library of Ballygunge Science College, University of Calcutta; Central Inland Capture Fisheries Research Institute, Barrackpore and British Council Library, for their whole-hearted co-operation without which I could not have completed this research work.

I take this opportunity to express my thanks to my classmates with whom I have learned a lot through mutual exchange of views and productive discussion.

Last but not least, I am thankful to all the members of my family, specially my parents for their constant support and encouragement during the course of my research programme.

Date: July 12
Place: Kolkata
