Acknowledgements

First of all, I am extremely grateful to my research guide Dr. S. K. Patil, University Librarian and Head, Department of library and Information science, (Retd.), Jayakar Library, University of Pune, for his guidance and all the scholarly discussions during the course of my research work. His deep insights helped me at various stages of my research. I also remain indebted for his understanding and support for carrying out my professional responsibilities while doing my research.

My sincere gratitude to Dr. B. M. Panage, University Librarian and Head, Department of Library and Information Science, Jayakar Library, for his valuable help and encouragement. I profusely thank Prof. Rajendra Kumbhar, who has ignited in me the true research spirit and nurtured it all through my study. Special thanks to Dr. Sadanand Bansode, for his timely suggestions in coping with the university formalities in the course of my research. My thanks are also due to other members of the teaching faculty and the staff of the Jayakar Library. I will be failing in my duty if I miss to acknowledge Dr. N. B. Dahibhate, NCL, Pune, for his constant motivation to complete my research work.

I would like to convey my heartiest gratitude to the Management of Adani Vidya Mandir, especially to the Trustee, Adani Foundation, Dr (Mrs.) Priti G Adani, and Trustee member Mrs. Shilin Adani for giving me the opportunity to pursue my research studies. I acknowledge with immense pleasure the support and encouragement of Dr. Bhadrayu Vachhrajani, Director (Education), Mr A Nath, Chief Co-ordinator, Adani Foundation and Ms Raji Jayaprasad, Principal, Adani Vidya Mandir. I would also like to take this opportunity to extend special thanks to the entire teaching faculty, my colleague Ms Mital Rathod at the library, administrative staff at Adani Vidya Mandir for their co-operation and support.

This thesis would not have taken shape without the valuable inputs given by the Esteemed Scholars who were involved in promoting and popularising
science, Digital Library Experts, Science Teachers and the School Librarians. I sincerely thank all of them.

I want to thank my loving and caring family. Thanks to my father and my mother for teaching me to be curious and at the same time be sincere to life, for always being there for me, providing unconditional love and care. I thank them for their faith in me and allowing me to be as ambitious as I wanted. It was their blessings that helped me to gain the zeal and ability to tackle challenges head on. Thanks to my in-laws, for giving me constant encouragement. Their prayers was what sustained me this far. My sister, my sister-in-law and my brother who have been my best friends, I thank them for their advice and affection especially during the research period.

I would like to acknowledge the most important person in my life – my husband. He being a library & information professional par excellence played a pivotal role in adding value to my academic, professional and research career. Whenever I was apprehensive about the topic, he would quote Albert Einstein “If we knew what it was we were doing, it would not be called research, would it?” and instil in me a new enthusiasm. There were times during the past five years when everything seemed bleak and I didn’t have any hope. It was his unstinted belief in me that made it possible for me to see this thesis through.

I owe everything to my son and daughter, Kshitij and Kriti in whom the basic source of my life energy resides. I appreciate their amazing patience, assistance and faith in me. The days away from them while writing my thesis were truly difficult. I could not have completed my research without the sacrifice of my two lovely children!

I would like to thank all my friends who supported me in pursuing research, and edged me on constantly to strive towards my goal. I wish to express my sincere appreciation to all those who have contributed to this thesis in one way or the other during this amazing journey.

Ms Rashmi T Kumbar
