TABLE OF CONTENTS

ABBREVIATION i-iv
LIST OF TABLES v-vi
LIST OF FIGURES vii-x
1. INTRODUCTION 1-3
2. OBJECTIVES 4
3. REVIEW OF LITERATURE 5-55
   3.1. Major contributors of cognitive dysfunction in diabetes
       3.1.1. Hyperglycemia
       3.1.2. Insulin signaling
       3.1.3. Hypothalamo pituitary Axis
       3.1.4. Oxidative stress
       3.1.5. Neuroinflammation
       3.1.6. Neurostructural changes
       3.1.7. Changes in Synaptic Transmission and Plasticity
   3.2. Omega-3 Polyunsaturated Fatty Acids
       3.2.1. History
       3.2.2. Sources
       3.2.3. Dietary recommendations for n−3 PUFA intake
       3.2.4. Pharmacokinetics
       3.2.5. Therapeutic potential of Omega-3 PUFA
           3.2.5.1. Cardiovascular disease
           3.2.5.2. Inflammation
           3.2.5.3. Ocular surface disease
           3.2.5.4. Asthma
           3.2.5.5. Rheumatoid arthritis
           3.2.5.6. Cancer
           3.2.5.7. Depression
           3.2.5.8. Bipolar disorder
           3.2.5.9. Attention-deficit hyperactivity disorder
           3.2.5.10. Spinal cord Injury
           3.2.5.11. Traumatic brain injury
           3.2.5.12. Diabetes
       3.2.6. Neuroprotective function of Omega-3 PUFA
       3.2.7. Molecular mechanism of neuroprotective effect of
              Omega-3 PUFA
           3.2.7.1. Omega-3 PUFA-Mediated Modulation of
                   Physicochemical Properties of membranes
3.2.7.2. Omega-3 PUFA-Mediated Modulation of Neurotransmission
3.2.7.3. Omega-3 PUFA-Mediated Modulation of Immunity, Inflammation and Apoptosis
3.2.7.4. Omega-3 PUFA-Mediated Generation of Neurite Outgrowth and synaptic plasticity

3.3. Neuroprotective effect of Vitamin C
3.4. Neuroprotective effect of Vitamin B₁₂
3.5. Hypothesis
3.6. Relevance of parameters studied
   3.6.1. Behavioral Study
   3.6.2. Biochemical Study

4. MATERIALS AND METHODS

4.1. Animal and housing
4.2. Induction of Diabetes Mellitus
4.3. Experimental design
4.4. Description of the supplement
4.5. Calculation of the dosage
4.6. Administration of the fish oil and flaxseed oil
4.7. Chemicals
4.8. Measurement of blood glucose
4.9. Behavioral tests
   4.9.1. Morris water maze test
   4.9.2. Step-Through Passive Avoidance test
   4.9.3. Open field test
   4.9.4. Elevated maze plus test
4.10. Preparation of tissue homogenate and blood sample collection
4.11. Brain oxidant & antioxidant System
   4.11.1. Estimation of lipid peroxidation (LPO)
   4.11.2. Estimation of protein peroxidation
   4.11.3. Estimation of reduced glutathione
   4.11.4. Estimation of total antioxidant by Ferric Reducing Ability of Plasma (FRAP)
4.12. Estimation of lipid profile
   4.12.1. Estimation of Triglyceride
   4.12.2. Estimation of Total Cholesterol
   4.12.3. Estimation of High density lipoprotein
4.13. ELISA analysis of brain derived neurotrophic factor (BDNF) level in hippocampus
4.14. ELISA analysis of brain derived neurotrophic factor (TNF-α) level in hippocampus
5. **STATISTICAL ANALYSIS**

6. **RESULTS**

6.1. Body weight and random blood glucose levels at the time of recruitment and at the time of sacrifice

6.2. Absolute and relative weight of cerebral cortex, frontal cortex, cerebellum and hippocampus.

6.3. Behavioral tests
   6.3.1. Morris water maze test
   6.3.2. Passive avoidance test
   6.3.3. Open field test
   6.3.4. Elevated Plus maze test

6.4. Biochemical tests
   6.4.1. Lipid profile results
   6.4.2. Brain oxidants and anti-oxidants results
      6.4.2.1. Lipid peroxidation
      6.4.2.2. Protein carbonyl
      6.4.2.3. Reduced Glutathione
      6.4.2.4. Total antioxidant capacity in different brain areas as assessed by Ferric Reducing Antioxidant Power (FRAP) assay
   6.4.3. BDNF level in hippocampus
   6.4.4. TNF-alpha level in hippocampus

7. **DISCUSSION**

7.1. Effect of omega-3 PUFA rich oils and vitamin C and B₁₂ on Body weight, Random blood glucose level, Brain weight

7.2. Effect of omega-3 PUFA rich oils and vitamin C and B₁₂ supplementation on diabetes induced cognitive dysfunction

7.3. Effect of omega-3 PUFA rich oils and vitamin C and B₁₂ on lipid profile and brain oxidative status

7.4. Effect of omega-3 PUFA rich oils and vitamin C and B₁₂ on Brain derived neurotrophic factor (BDNF) of different brain areas

7.5. Effect of omega-3 PUFA rich oils and vitamin C and B₁₂ on Tumor necrosis factor-alpha (TNF-alpha) of different brain areas

8. **CONCLUSION AND SUMMARY**

9. **PROSPECTIVES**

10. **BIBLIOGRAPHY**

11. **APPENDICES**
