## Contents

List of Chapters ................................................................. i
Abbreviations and Acronyms ................................................. vi
List of Tables ........................................................................ xiv
List of Figures ........................................................................ xiv
List of Maps ........................................................................... xv

Overview ................................................................................... xvi

### Chapter 1

**From National Income Accounting to Integrated Environmental and Economic Accounting** ................................................................. 1.1
1.1 Objectives of Maximizing Income versus Welfare versus Sustainability ........................................ 1.1
1.2 Limitations of the Conventional National Accounts ......................................................................... 1.5
1.3 Need for Natural Resource Accounting in Developing Countries .................................................... 1.11

### Chapter 2

**SEEA Framework for Different Resources / Sectors and its Implementation** .......................................... 2.1
2.1 Objectives of the SEEA .......................................................... 2.2
2.2 Asset Boundaries under the SNA and the SEEA ................................................................................. 2.4
2.2a Environmental Assets in the SNA 1993 .............................................................................................. 2.4
2.2b Environmental Assets in the SEEA 2003 ......................................................................................... 2.6
2.3 Construction of Asset Accounts under the SEEA 2003 ...................................................................... 2.9
2.4 Variants of the SEEA and Development of the Framework for Implementation .................................. 2.12
2.5 Progress of Implementation of SEEA in Different Countries .............................................................. 2.17

### Chapter 3

**Accounting for Energy Resources** ........................................... 3.1
3.1 Current and Proposed Treatment of Mineral Resources in National Accounts .................................. 3.1
3.2 Current and Proposed Classification System of Mineral Resources in India ..................................... 3.4
3.3 Construction of Asset Accounts in Physical Terms ............................................................................ 3.12
   Extraction, Discoveries and Reappraisals ......................................................................................... 3.12
   Unit of Measurement .................................................................................................................... 3.13
   A typical SEEA-based Asset Account for Oil Reserves ................................................................... 3.14
3.4 Construction of Asset Accounts in Monetary Terms ........................................................................ 3.15
Sustainable Resource Accounting: A case study of the Fossil Fuel Sector

Net Resource Rent 3.15
Negative Resource Rent 3.16
Return to man-made Capital 3.16
Resource Rent per unit to value Stocks of Mineral Reserves 3.17
Expected lifetime of Reserves 3.18
Social Rate of Discount 3.19
Estimating Components of the Change in the Value of Reserves 3.20

3.5 ‘Hicksian Income’, Hartwick’s (current-value) Hamiltonian’ and ‘Hotelling-rent: The three ‘H’s at the heart of NRA. 3.22
3.6 Standard Approaches to Measuring the Value of Depletion of Mineral Resources 3.25
3.6a Measuring Depletion based on the 'Change-in-Value (CIV)' Approach 3.25
3.6b Measuring Depletion based on total Hotelling Rent (Net-Price) Approach 3.26
3.6c Measuring Depletion based on El-Serafy's 'User-Cost' Approach 3.29

Appendix to Chapter 3
Components of Change in Value of Reserves 3.32

Chapter 4
An Overview of India’s Energy Sector 4.1
4.1 India’s Energy Profile 4.1
4.2 An overview of the Oil and Natural Gas sector in India. 4.4
4.2a Reserves, Production and Import of Oil in India 4.5
4.2b Reserves, Production and Import of Natural Gas in India 4.8
4.2c Organisation of the Oil and Gas Industry in India 4.10
4.3 An overview of the Coal sector in India. 4.12
4.3a Reserves, Production and Import of Coal in India 4.12
4.3b Total versus Mineable versus Extractable Coal Reserves in India 4.13
4.3c Organisation of the Coal Industry in India 4.20

Appendix to Chapter 4
A brief profile of Coal Companies in India 4.22

Chapter 5
Physical Accounting for the Fossil Fuel Sector in India 5.1
5.1 Constructing the Physical Asset Accounts for the Fossil Fuel sector in India. 5.2
5.2 Physical Asset Accounting for Crude Oil Reserves in India (1970/71 to 2005/06) 5.3
5.2a Reserves of Crude Oil in India 5.3
5.2b Production of Crude Oil in India  
5.2c Physical Asset Accounts for Oil Reserves in India  
   Main Observations  
5.3 Physical Asset Accounting of Natural Gas Reserves in India  
(1970/71 to 2005/06)  
5.3a Reserves of Natural Gas in India  
5.3b Production of Natural Gas in India  
5.3c Physical Asset Accounts of Natural Gas Reserves in India  
   Main Observations  
5.4 Physical Accounting of Coal Reserves in India  
(1970/71 to 2005/06)  
5.4a Reserves of Coal in India  
5.4b Production of Coal in India  
5.4c Physical Asset Accounts of Coal Reserves in India  
   Main Observations  

Chapter 6  
Monetary Accounting for the Fossil Fuel Sector in India  
6.1 Monetary Accounting of the Oil and Natural Gas reserves in India  
(1989/90 to 2005/06)  
6.1a Resource Rent Estimation and Monetary Asset Accounting of Oil and  
Natural Gas Reserves in India  
   Main Observations  
6.1b Value of Depletion of Oil and Natural Gas Reserves in India  
6.1c Sectoral GDP Adjusted for Depletion of Oil and Natural Gas Reserves  
in India  
6.2 Monetary Accounting of the Coal Reserves in India  
(1989/90 to 2005/06)  
6.2a Resource Rent Estimation and Monetary Asset Accounting of Coal  
Reserves in India  
   Main Observations  
6.2b Value of Depletion of Coal Reserves in India  
6.2c Sectoral GDP Adjusted for Depletion of Coal Reserves in India  
6.3 Sectoral GDP Adjusted for Depletion of Fossil Fuel Reserves in India  

Appendix to Chapter 6  
Cost Structure of CIL Subsidiaries
Chapter 7
Valuation of Degradation Costs Associated with the use of Natural Resources

7.1 Valuation of Environmental Degradation 7.4
7.2 Maintenance Cost-Based Methods to Value Degradation 7.5
7.2a Abatement Cost Method 7.5
7.2b Restoration Cost Method 7.7
7.3 Damage-Based Methods to value Degradation 7.7
7.3a Physical Impact Assessment 7.8
Dispersion Modeling for Physical Impact Assessment 7.9
Dose-Response Functions for Physical Impact Assessment 7.20
Health Impact Assessment 7.20
7.4 Monetary Impact Assessment 7.34
7.4a Valuation of Health Effects 7.34
7.4b Valuing Morbidity 7.35
Willingness to Pay (WTP) Approach 7.35
Cost of Illness (COI) Approach 7.36
7.4c Valuing Mortality 7.36
Value of Statistical Life based on the WTP approach 7.37
Value of Statistical Life based on the Human Capital Approach 7.38

Chapter 8
The Growing Problem of Air Pollution in the State of Delhi 8.1
8.1 An overview of the National Capital Territory of Delhi 8.6
8.2 Sources of Air Pollution in Delhi 8.12
8.2a Vehicular pollution in Delhi 8.12
8.2b Industrial sources of air pollution in Delhi 8.14
Thermal Power Plants 8.14
Small-Scale Industries 8.16
8.2c Domestic sources of Air Pollution in Delhi 8.16
8.3 Air Pollution Standards and Trends 8.17
8.4 Evidence of serious Health Impacts due to Air Pollution in Delhi 8.24

Appendix to Chapter 8
Important Air Pollutants 8.26
Suspended Particulate Matter (SPM) 8.26
Sulfur Dioxide (SO₂) 8.27
Oxides of Nitrogen (NOₓ) 8.28
Carbon Monoxide (CO) 8.28
## Chapter 9

**Health Damage Cost due to Emissions from Power generation and Automobiles in Delhi**

<table>
<thead>
