Acknowledgement

I would like to take this opportunity to express my sincerest thanks and gratitude to my supervisors Professor Suranjan Ghose and Professor Rana Dattagupta, without whose careful guidance and constant encouragement this thesis could not have been completed in its present perspective. My frequent interactions with them during the course of this work have enabled me to strengthen my analytical power of tackling a given problem. I am truly indebted to them.

I am very thankful to all my colleagues especially Atish Datta Chowdhury and Arul Ganesh for their encouragement, help, advice, and support during the last two years. I must also mention the constant inspiration I received from Professor Bhargab B. Bhattacharya, Professor Nabanita Das, Dr. Susmita Sur-Kolay and Dr. Sandip Das of Indian Statistical Institute, Calcutta during the course of my research.

I would like to thank the Jadavpur University and my employer Honeywell Technology Solutions Lab, Bangalore for providing me an excellent research environment and the opportunity to get acquainted with distinguished researchers during the last couple of years of this research work. The development of this thesis would not have been possible without the support from Honeywell Technology Solutions Lab, Bangalore.

I feel a deep sense of gratitude towards my parents who formed a part of my vision and encouraged me to pursue this research work.

I am also thankful to Prathasarathi Mandal, Gautam Das, Arindam Karmakar, Subhasish Bhattacharjee from the ACM Unit of Indian Statistical Institute and all my friends who extended their support and cooperation in completing this work.
