LIST OF FIGURES

Figure 1: Outline of the identification of hazard and assessment of risk process (Adopted from OHSAS 18002:2008) ................................................................. 3-41
Figure 2: Steps involve in HIRA ........................................................................ 3-69
Figure 3: HSE inspection for Housekeeping .......................................................... 5-86
Figure 4: HSE inspection for Barricading ............................................................ 5-86
Figure 5: HSE inspection for Electrical Work ....................................................... 5-87
Figure 6: HSE inspection for Hot Work ............................................................... 5-88
Figure 7: HSE inspection for Mechanical Work ................................................... 5-88
Figure 8: HSE inspection for Excavation Work .................................................... 5-89
Figure 9: HSE inspection for Hand rails / Edge protection ..................................... 5-89
Figure 10: HSE inspection for Material Handling / Lifting .................................... 5-90
Figure 11: HSE inspection for Hand tool & Power tools ....................................... 5-90
Figure 12: HSE inspection for PPE’s ................................................................. 5-91
Figure 13: HSE inspection for Fire ........................................................................ 5-91
Figure 14: HSE inspection for others ................................................................. 5-92
Figure 15: Non-compliance from external audit for three companies (A, B and C) (2010-2014) ................................................................................................... 5-92
Figure 16: Critical areas at company A B & C (2010-2014) ................................. 5-100
Figure 17: Total number of major accident (2007 – 2014) at three construction site .................................................................................................................. 5-102
Figure 18: Injured case (month wise) ................................................................. 5-108
Figure 19: Injured case (Body part wise) ............................................................. 5-108
Figure 20: Activity wise injury analysis .............................................................. 5-109
Figure 21: Cumulative risk rating and legend ..................................................... 5-115
Figure 22: Modified risk level (MRL) ............................................................... 5-117
Figure 23: Framework of risk assessment ......................................................... 5-128
Figure 24: Analysis of previous four months incident record Site A ................. 6-148
Figure 25: Analysis of previous four months incident record Site B ............... 6-149
