Acknowledgement

This thesis is by far the most significant scientific accomplishment of my life, which has been made possible by the constant support of many people. I feel this as a good opportunity to express my gratitude to all of them.

First, I would like to thank my supervisor, Dr. Dinkar Sahai; who is not only a good scientist but also a caring and an understanding person. I would also like to thank him for encouraging and giving me the freedom to test ideas that crossed my mind.

I thank Prof. V.S. Chauhan for his constant support in my work and his invaluable suggestions and insight.

I am grateful to Dr. S. Raghotma and Dr. Dinesh Gupta for giving their precious time to make me understand NMR and molecular modeling (AMBER).

The financial support from the Council of Scientific and Industrial Research during my PhD tenure is greatly acknowledged. And I am proud to work in ICGEB, an institute working for “third world cause”.

I am very thankful to Dr. R.A. Vishwakarma, and Dr. V. Manivel and Rashmi Tikku for helping me to get the mass spectrum etc.

My regard and gratitude to ICGEB faculty Dr. Sudhir Kumar Sopory, Dr. Narendra Tuteja, Dr. Pawan Sharma, Dr. Pawan Mallotra, Dr. Raj Bhanagar, Dr. Kanury Rao, Dr. SK Lal, Dr. Vijay Kumar, Dr. Shahid Jameel, Dr. Chetan Chitnis, Dr. S. Swaminathan, Dr. Siva Reddy, Dr. Renu Tuteja and Dr. SK Mukherjee for scientific discussions.

I would like to thank HS Narayanan, Pratibha Chaturvedi, Surya Mishra, K. Murli and ICGEB administration staff for their extended help.

I am very thankful to Ken Suslick, RJP Williams and Angelino ghio, and P. Guptasarma, Kevin Smith, Peter Loewen, Henriette Remmer, David Case Janet Thornton, Andrew Salt and scopio for suggestions and useful discussions through e-mail etc.

Personal support extended by my family and friends has also been vital for completing this venture. I owe my inspirations to Tasneem Jamal and Omprakash Mahar and my Grandfather.

Jagdish Rai
