Chapter-1

Introduction .............................................................................................................................. 1

1.1 Differences in prospective and retrospective memory (“What”) .................................. 3
1.2 Understanding Prospective Memory ............................................................................. 3
  1.2.1 Nature of prospective memory ............................................................................... 4
  1.2.2 Subdomains of prospective memory ...................................................................... 4
  1.2.3 Prospective memory stages and intention ............................................................... 6
    1.2.3.1 Encoding ........................................................................................................... 7
    1.2.3.2 Storage ............................................................................................................ 8
    1.2.3.3 Retrieval ......................................................................................................... 9
    1.2.3.4 Performance .................................................................................................. 11
1.3 Theories of Prospective Memory .................................................................................. 12
  1.3.1 Model of Attentional Control of Behavior .......................................................... 12
  1.3.2 Preparatory Attentional and Memory Processes (PAM) theory ......................... 12
  1.3.3 Multi-Process Theory ......................................................................................... 13
1.4 Models of Prospective Memory ................................................................................... 14
  1.4.1 Automatic Association Activation Framework .................................................... 14
  1.4.2 Ellis’ Framework (1996) .................................................................................... 16
  1.4.3 Goshke and Kuhl’s Framework ........................................................................... 19
1.5 Outline of the Chapters ............................................................................................... 22
Chapter-2
Review of Literature..................................................................................................................24
Objectives of the Present Research..........................................................................................37

Chapter-3
Role of Gender and Depressive Symptoms on Prospective Memory ....44
Method ........................................................................................................................................47
Results .......................................................................................................................................49
Discussion ..............................................................................................................................59

Chapter-4
Understanding Everyday Prospective Memory-Role of Nature of Task,
Importance of task and Depressive Symptoms.................................................................63
Method ........................................................................................................................................67
Results .......................................................................................................................................69
Discussion ..............................................................................................................................83

Chapter-5
Understanding the Nature of Prospective Memory among Patients of
Substance Abuse .....................................................................................................................88
Method ........................................................................................................................................90
Results .......................................................................................................................................92
Discussion ..............................................................................................................................106

Chapter-6
General Discussion....................................................................................................................109
Major findings of the Research...............................................................................................117
Directions for Future Researches............................................................................................118
References ...............................................................................................................................119
List of Tables

Table 3.1: Main effect of gender on prospective memory and retrospective memory ........................................50
Table 3.2: Main effect of depressive symptoms on prospective memory and retrospective memory ..................50
Table 3.3: Interaction effect of gender and depressive symptoms on prospective memory and retrospective memory ..................51
Table 3.4: Main effect of gender on long-term and short-term prospective and retrospective memories ..................52
Table 3.5: Main effect of depressive symptoms on long-term and short-term prospective and retrospective memories ..................53
Table 3.6: Interaction effect of gender and depressive symptoms on long-term and short-term prospective and retrospective memories ...............................................................54
Table 3.7: Main effect of gender on environmental cued and self-cued prospective and retrospective memories ..................55
Table 3.8: Main effect of depressive symptoms on environmental cued and self-cued prospective and retrospective memories ......................................................................................56
Table 3.9: Interaction effect of gender and depressive symptoms on environmental cued and self-cued prospective and retrospective memories .........................................................................57
Table 4.1  Distribution of sample according to the depressive symptoms (N=46). .................................................................69

Table 4.2  Showing the nature of tasks planned and its frequency...........71

Table 4.3  Showing number of tasks (percentage) planned under different themes of nature of tasks............................................72

Table 4.4  Showing percentage of tasks planned, completed, partially completed and not completed out of a total number of tasks planned. .................................................................73

Table 4.5  Showing number of tasks planned based on the importance assigned by the participants. .................................74

Table 4.6  Importance of Task- showing the percentage of tasks completed, partially completed and not completed based on the importance assigned by the participants out of a total number of tasks planned. ...........................................75

Table 4.7:  Main effect of depressive symptoms on task planned ..........77

Table 4.8:  Main effect of depressive symptoms on task completed ..........78

Table 4.9:  Main effect of depressive symptoms on partially completed tasks.................................................................79

Table 4.10:  Main effect of depressive symptoms on non- completed Tasks ..................................................................................80

Table: 5.1  Effect of age (lower, middle and higher) on various aspects of the retrospective memory of substance abuse participants. ..............................................................................93
Table: 5.2  Effect of age (Lower, Middle and Higher) on various aspects of the prospective memory of substance abuse participants. .................................................................97

Table: 5.3  Showing significance of mean difference between normal and substance abuse participants on various aspects of retrospective memory.................................................................101

Table: 5.4  Showing significance of mean difference between normal and substance abuse participants on various aspects of prospective memory.................................................................104
List of Figures

Fig. 1.1  Shows resource allocation for vigilance and prospective memory tasks. A conceptual model (Graf. And Uttl, 2001) .......5

Fig. 1.2. Schematic representation of types of delayed intention classified according to variations at the encoding, storage, retrieval and performance phases of PM. (Source: Brandimonte, Einstein, and McDaniel, (1996))..........................7

Fig. 4.1  Showing distribution of sample according to the depressive symptoms (N=46). ..............................................................70

Fig. 4.2  Showing percentage of tasks planned, completed, partially completed and not completed based on the importance assigned by the participants out of a total number of tasks planned.................................................................76
List of Appendices

1. Prospective and retrospective memory questionnaire

2. Beck Depression Inventory

3. Planning Activity Sheet (a)

4. Planning Activity Sheet (b)

5. Consent Form
