

Contents

1.	Introduction	1-7
1.1	Introduction	2
1.2	Motivation	3
1.3	Objectives	4
1.4	Contributions	5
1.5	Outline	6
2.	IPv6 and Internet Migration	8-28
2.1.	Introduction	9
2.2.	Internet Protocol Version 6 (IPv6)	11
2.2.1	Header Structure	11
2.2.2	Addressing Types	13
2.2.3	Extension Headers	15
2.3.	Need for Migration	16
2.4.	Challenges to Migration	19
2.4.1	Technical Issues	20
2.4.2	Non Technical Issues	22
2.5	Guidelines to Migration	23
2.6	IPv6 Deployment in the World	24
2.7	Summary	28
3.	Evaluating Performance of IPv6 Migration Techniques	29-48
3.1	Introduction	30
3.2	Transition Mechanisms	31
3.2.1	Dual Stack	31
3.2.2	Tunneling	32
3.2.2.1	Types of Tunnels	34
3.2.3	Translation	35
3.3	A Comparative Analysis	38
3.4	Introduction to OPNET Simulation	40
3.5	Performance Analysis of Migration Techniques	43
3.5.1	Related Work	44
3.5.2	Simulation Setup	45
3.5.3	Results	46
3.6	Summary	48

4.	IPv6 Security Issues and Evaluation	49-74
4.1	Introduction	50
4.2	Security Vulnerabilities in IPv4/IPv6	51
4.2.1	Reconnaissance Attacks	51
4.2.2	Host Initialization Attacks	52
4.2.3	Broadcast Amplification Attack (Smurf Attack)	54
4.2.4	Header Manipulation and Extension Headers	55
4.2.5	Routing Attacks	56
4.2.6	Firewall Evasion by Fragmentation	56
4.3	Security Issues in Transition Networks	57
4.3.1	Exploiting the Dual Stack	58
4.3.2	Exploiting Tunnels	59
4.3.3	Protocol Translation (NAT64)	60
4.4	Internet Protocol Security (IPSec) As Solution	60
4.4.1	IPSec Architecture Analysis	61
4.4.1.1	Authentication Header	61
4.4.1.2	Encapsulating Security Protocol	62
4.4.1.3	IPSec Security Association	64
4.4.1.4	IPSec Key Management	65
4.4.2	Issues with IPSec	65
4.4.3	Related work	66
4.4.4	Simulation Scenario Setup	68
4.4.5	Results	70
4.5	Summary	73
5.	Link Layer Security Analysis and Optimization	75-98
5.1	Introduction	76
5.2	Neighbor Discovery Protocol (NDP)	77
5.3	Neighbor Discovery Security Issues	79
5.4	Secure Neighbor Discovery (SEND) - A Cryptographic Solution	80
5.5	IPv6 Cryptographically Generated Address	82
5.5.1	CGA Specification	83
5.5.2	Cost Analysis of CGA	85
5.5.3	CGA Limitations	86
5.5.4	Proposed Modifications to CGA	90
5.5.5	Implementation and Evaluation	93
5.6	SEND Deployment Challenges	96
5.7	Summary	97

6.	Securing IPv6 Stateless Address Auto Configuration	99-114
6.1	Introduction	100
6.2	Stateless Address Auto Configuration (SLAAC)	101
6.3	Security and Privacy Implications in SLAAC	104
6.4	Proposed Model	107
6.5	Implementation and Evaluation	112
6.6	Summary	114
7.	Conclusion	115-118
7.1	Conclusion Drawn	116
7.2	Future Work	117
	List of Figures	119
	List of Tables	121
	Acronyms Used	122
	List of Publications	123
	References	124-130
