ACKNOWLEDGEMENT

As I look back over my educational career I see many people who have helped me through the journey. I would like to begin by thanking the Almighty for giving me the ability to pursue my education. Having God by my side and for helping me through the tough times has made this journey much easier.

A thesis of this nature could never have been attempted without the help of others. In the preparation of this thesis, I have had to consult constantly numerous books & journals on related topics; and I hereby acknowledge my indebtedness to them all.

I wish to express my sincere gratitude, endless indebtedness and heartfelt reverence to my supervisor Prof. Ajit Kumar Dolui, Professor and Ex-Head, Department of Agricultural Chemistry and Soil Science, Ex-Dean and Director, Institute of Agricultural Science, University of Calcutta, for his valuable guidance, thoughtful advice, inspiring suggestions, kind help and constant encouragement throughout the tenure of this investigation.

It gives me great pleasure to express my deep sense of gratitude to my associate supervisor Dr. Sanjib Kar, honorable teacher, Department of Agricultural Chemistry and Soil Science, Institute of Agricultural Science, University of Calcutta, for his valuable guidance, thoughtful advice, kind help and constant encouragement throughout the course of this investigation.

I wish to express my deep appreciation to all the Ph.D. committee members for providing valuable suggestion.

I would be failing in my duties if I do not express my feelings of deep gratitude to Dr. Pratap Das, Ex-Assistant Director, Indian Institute of Chemical Biology; Prof. Tapan Kumar Pariya, Professor, Department of Chemical Technology, University of Calcutta; Prof. Dilip Kumar Das, Ex-Professor, Department of Agricultural Chemistry and Soil Science, Bidhan Chandra Krishi Viswavidyalaya,
Mohanpur, Nadia for providing necessary instrumental facilities for successful completion of this work,

I am also grateful to Mr. Sapta Mondal (farmer) for allowing me to use his agricultural field for experimental purpose and providing help in every possible way.

I also convey my heartiest thanks to the librarian of the Institute of Agricultural Science for providing good library facilities.

I am grateful to Mr. Sunil Gupta, Mr. Arabinda Jana, Mr. Krishna Chandra Ghosh, Mr. Ranjit Giri and Mr. Birbrata Bindu for providing excellent laboratory facilities.

My sincere thanks to all the visiting faculty members of the Department of Agricultural Chemistry and Soil Science and non-teaching staffs, Institute of Agricultural Science, University of Calcutta for their timely help.

I owe my heartfelt thanks to my fellow research scholars Mr. Subhrapakash Kajli, Mrs. Priyama Roy and Mrs. Anindita Seth for their help in every possible ways to complete my work. My thanks are due to all my juniors for their pleasant cooperation and assistance.

My gratitude extends to the Estate and Trust Office, University of Calcutta for awarding me with honorary endowment “Payodhini Mukherjee Research Fellowship” from 2011 to 2014 for successful completion of this work.

Last, but not least, I express my deep obeisance to my parents for their silent devotion, moral support, constant inspiration and patient endurance. I dedicate this thesis to my parents, in particular, to my mother who always stands firmly behind me and my heavenly father for his blessings and strength to complete this study.
