ACKNOWLEDGEMENT

I wish to express my honest and sincere gratitude to Professor Abhijit Biswas and Professor Abhijit Mallik from the core of my heart for their sagacious guidance, stimulating discussion and sustained interest during the course of this research work. I am really lucky to get them as my preceptors, as my supervisors. They gave me all sorts of freedom and flexibility to carry out my research work, while at the same time provided me with all the valuable information, good ideas and insights for my subject of thesis. Their incredible support, patience and motivation towards my work really demand a great value.

I am immensely grateful to my parents Dr. Arun Kumar Tewari and Mrs. Krishna Tewari for their inspiration, guidance, unconditional love and support in each and every sphere of my life. They are responsible for making me who I am today.

I am thankful to my colleague and friend Dr. Avik Chattopadhyay for helpful discussion regarding my research work.

My thanks are due to all my friends, who have made my life refreshing and full of joy, and to all those people whose non-cooperation acts as a positive catalyst to make me more determined, more self-sufficient and make me believe more strongly that, I can do it alone, both in the field of research and in my personal life. Thank you all my critics for pointing out my imperfections only to make me more perfect.

Last but not the least, I would like to express my gratitude to all the teaching and non-teaching staff of my Institution, Institute of Radio Physics and Electronics, University of Calcutta, where I have carried out my research work in a peaceful environment.

I would like to acknowledge CSIR, HRDG, Government of India, for providing me the senior research fellowship (SRF).
