ACKNOWLEDGEMENT

It is with profound feeling of gratitude that I record my indebtedness to Dr. Ing. J. D. Panda, Director, Dalmia Institute of Scientific and Industrial Research, Rajgangpur for introducing me to the field of research in ceramics and providing the necessary facilities to carry out the present research work and the keen interest shown by him throughout the research period.

I am deeply grateful to Dr. N. Sahoo, Research Ceramist of the said Institute for his constant guidance, encouragement and sustained interest in the execution of this investigation and in the completion of the thesis.

I am sincerely thankful to Dr. G. Goswami, Principal Scientist of the said Institute for his kind help and valuable suggestions during carrying out the mineralogical investigations. Thanks are due to Mr. B. P. Padhi, Mr. B. Mishra, Mr. P. Sahu and my other colleagues for their help during the course of this work.

I wish to offer my sincere thanks to Prof. K. C. Satpathy of Post Graduate Department of Chemistry, Sambalpur University for his valuable suggestions as and when required during the investigation.

The present piece of research work could be undertaken mainly due to the inspiration and sacrifice on the part of my wife Sagarika.

My sincere and special thanks are due to Syt. M. H. Dalmia, President and Syt. R. H. Dalmia, Vice-President, Council of Management of Dalmia Institute of Scientific and Industrial Research for their constant encouragements during the course of work. My sincere thanks are also to management of Messrs. Orissa Cement Limited for providing all plant facilities to carry out experimental work.
