Abstract

I. INTRODUCTION

1.1 Chloroplast Structure and Organisation 1

1.1.1 Ultrastructure 1

1.1.2 Composition of Chloroplasts 3

1.1.2.1 Photosynthetic Pigments 3

1.1.2.2 Macromolecules 4

1.1.3 Organisation 5

1.1.3.1 Photosystems 5

1.1.3.2 Electron Transport Chain 6

1.1.3.3 Oxygen Evolving Complex 6

1.2 Electron Transport 6

1.3 Chloroplast Development 8

1.3.1 Accumulation of Pigments 8

1.3.2 Accumulation of Chloroplast Proteins 10

1.3.3 Photosynthetic Assemblies 12

1.4 Chloroplast Senescence 12

1.4.1 Loss of Pigments 13

1.4.2 Loss of Lipids 15

1.4.3 Loss of Macromolecules 15

1.4.4 Ultrastructural Changes 16

1.4.5 Optical Changes 19

1.4.6 Disassembly of PS I and PS II:
Loss of Electron Transport Efficiency 20

1.5 Mitochondrial Activities During Senescence 22
### 2.7 Estimation of Pigments 44
### 2.8 Measurement of Absorption Spectra 44
### 2.9 Measurement of Fluorescence Characteristics 45
  - 2.9.1 Fluorescence Emission 45
  - 2.9.2 Fluorescence Excitation 45
### 2.10 Measurement of 2,6-Dichlorophenol Indophenol Photoreduction 46
### 2.11 Measurement of Methyl Viologen Reduction 46
### 2.12 Measurement of Succinate Dehydrogenase Activity 47

### III. RESULTS 48

#### 3.1 Changes in Photosynthetic Pigments 48
  - 3.1.1 Alterations in The Pigment Content Induced by Continuous High, Moderate and Low Lights 48
  - 3.1.2 Changes in The Content of The Pigments During Moderate-Low Light and Light-Dark Shifts 49
  - 3.1.3 Changes in The Content of The Pigments During Low-Moderate Light and Light-Dark Shifts 52
  - 3.1.4 Changes in The Content of The Pigments Induced by Interacting Stress Factors 55

#### 3.2 Changes in Absorption Spectra 58

#### 3.3 Changes in Fluorescence Characteristics 60
  - 3.3.1 Fluorescence Emission 60
  - 3.3.2 Fluorescence Excitation Spectra 62
### 3.4 Changes in Primary Photochemical Reactions of Thylakoid Membrane

#### 3.4.1 PS II Photochemistry as Probed by 2,6-Dichlorophenol Indophenol Hill Reaction

#### 3.4.2 Photochemical Reactions Associated with PS I and PS II as Measured by Methyl Viologen Reduction

### 3.5 Changes in The Activity of Succinate Dehydrogenase

### IV. DISCUSSION

#### 4.1 Low Light Induced Modulation of Chloroplast Development During Greening

#### 4.2 Low Light Induced Modulation of Chloroplast Degradation During Senescence

#### 4.3 Senescence of Chloroplasts Under Interacting Stress Factors

### V. SUMMARY AND CONCLUSIONS

### VI. REFERENCES
