ACKNOWLEDGEMENTS

I wish to express my sincere appreciation and thanks to Professor S. N. Ratha, my Research Guide, for his valuable guidance and assistance at every stage of the study and till the preparation of this manuscript.

I am grateful to Professor M. S. Gore, former Chairman, Mr. S. P. Tare, former Director, Dr. A. M. Kurup, former Chief Research Scientist, Centre for Social Science Research on Leprosy, Gandhi Memorial Leprosy Foundation, who permitted in-service registration for Ph.D. and allowed me to use part of the data I collected for the project 'Psycho-social counselling and guidance for leprosy afflicted'.

Thanks are due to Prof. R. K. Mutatkar, Dept. of Anthropology, University of Pune, Prof. Vijay Kochar, Dept. of Sociology, University of Hyderabad and Dr. S. N. M. Kopparty, Dy. Director, ICSSR, New Delhi for their valuable suggestions in the conceptualisation of the research problem.

I am greatly obliged to the Chairman of Gandhi Memorial Leprosy Foundation, Shri Chandrashekhar Dharmadhikari for permitting me to continue this study, while in service.

My special thanks are to Dr. A. M. Kurup for his familiarity with the subject of my study was a constant support and for his concern to see this undertaking completed; and Dr. V. V. Dongre, Director, Gandhi Memorial Leprosy Foundation, who took personal interest in the completion of my assignment and provided all facilities for computerisation, data analysis using SPSS, word processing and arranging secretarial assistance.

Mr. M. G. Ranade, former Dy. Director, Gandhi Memorial Leprosy Foundation provided guidance in applying various statistical models during data analysis phase and Mr. Sibi Alex who helped in data analysis. I am thankful to both of them.

Thanks are also due to the staff members of the project 'Psycho-social Counselling and Guidance for Leprosy Afflicted', staff of the Centre for Social Science Research on Leprosy, Gandhi Memorial Leprosy Foundation and GMLF referral hospital, for their co-operation at different stages.

Most important was the co-operation of the leprosy patients of GMLF Referral Hospital, without whose co-operation this study would not have been completed. They too deserve my special thanks.

This work of mine is dedicated to my parents without whose constant support and determination, this work could never be concluded.

M.S. RAJU
