ACKNOWLEDGEMENT

I wish to record my deep sense of gratitude to my revered teacher Prof.(Dr) Manish Kumar Chakravarty, a Professor and an educationist par excellence under whose supervision and able guidance this work has been completed. I feel myself extremely fortunate and privileged to have worked under his consistent and enlightening supervision. In fact, this project would never have been materialized without his visionary insight, tremendous patience and undaunted spirit which helped me sustain my perseverance throughout.

I also express my obligation to Prof.(Dr) Namita Mohanty, Professor of Psychology, Utkal University, Vani Vihar for her guidance and valuable innovative inputs for the thesis.

I am extremely grateful to my younger brother Dr. Mihir Kumar Das, Reader in Botany, G.M. College, Sambalpur who has always inspired me to pursue this phase of research and taken enough pains to ensure that the process is successfully completed. His high level of sincerity and commitment has considerably contributed to upholding my energy level and created enough breathing space for me.

I am deeply indebted to all my family members for their co-operation and tolerance in positive environment building.

I am also thankful to my colleagues of IIEC who have persistently shared my official burden for allowing me to concentrate on this research project. Any lacking in their understanding and appreciation of my initiative would have jeopardized my efforts to complete this task.

Shisir Kumar Das
