ACKNOWLEDGEMENT

It gives me immense pleasure and pride to express my deep sense of gratitude for my teachers and guides Dr. D. Ramachandran & Prof. C. Rambabu Research supervisors, Acharya Nagarjuna University, Guntur for their evergreen expertise and astute guidance. Their unabated enthusiasm, which stems from their absolute command over the subject, has been a constant source of inspiration to me to work hard and the outcome is expressed in the form of this thesis. It would not have been impossible to achieve this goal without their support and care.

I am highly obliged to thank the coordinator, Department of chemistry, Acharya Nagarjuna University, and Head, Department of chemistry, ANU PG Centre, Nuzvid, for providing necessary facilities for carrying out the work.

I am thankful to Dr. M. Gowri sankar, J.K.C. College, Guntur for his helpful discussions and constant encouragement throughout the progress of the thesis.

I express my sincere gratitude to President, Secretary & Correspondent and Management of Sathavahana College, Vijayawada Sri. Alapati. Rajendra Prasad, and the Principal, for encouragement offered throughout my career.

I would like to express my deep heartfelt thanks to Department of chemistry (Sathavahana College) and also my friends Smt. Sandhya Sri, Smt. A. Charitha and Satyanarayana for their co-operation and encouragement during the completion of this work.

B. JHANSI LAKSHMI
