Acknowledgments

First of all I wish to thank the Almighty for having stood by me when I needed him most.

I offer my gratitude and respect to my supervisor Sudha madam, for her unrelenting pursuit for excellence; her advice and critical insight has taught me the essence of good science. She has always encouraged me to bring out the best in me and working in her guidance has been an educating experience. The discussions in the routine lab meeting were very useful for personality development and for this both Sudha madam and Alok sir deserve a special thanks.

I wish to thank Alok sir for his critical suggestions and help in bioinformatics matters. In addition his enthusiasm for science and his multi-dimensional personality are infectious.

I wish to thank Jaishree ma'am for helping me with a lot of moral support whenever needed. I thank Swati ma'am for a cordial atmosphere in the lab. I am impressed by the positive attitude of Varsha madam.

My thanks to the Dean and the staff of School of Environmental Sciences for help extended during the course of this study. I also extend my thanks to the CIF staff of SLS for all help extended. The timely financial assistance of Council of Scientific and Industrial Research is gratefully acknowledged. A special mention goes to Shri. Sahoo and Shri. Harpal Singh of CSIR and the staff of the scholarship and project section at JNU who helped me get the scholarship on time.

I wish to thank Dr. Andrew Lynn from Bioinformatics Centre JNU for his constant encouragement to learn Perl and for providing assistance with a ready smile always. I also thank the students of BIC especially Anchal, Vivek, Kamal, Soumyadeep for their help and assistance.

Thanks are due to the Richard Stallman, Linus Torvalds, and the Free Software Foundation, for introducing the world of Linux to me and to Tom Hall for the excellent suite he has created in the form of BioEdit. This work would not have been possible without the service infrastructure provided by the National Centre for Biotechnology Information (NCBI), European Bioinformatics Institute, The Sanger Centre and The Institute for Genome Research (TIGR).

For most of us, the lab becomes a home away from home. I have been fortunate to have received the love and affection of my lab mates. Satish da and Nivu remain special for many reasons. I had the pleasure to enter an atmosphere where I learnt actual benchwork from my excellent seniors. I thank Chaki, Soma di, Ranju, Rachana di and Anindya for excellent guidance.
in the lab whenever I needed directions. Satish da was an excellent mentor to me and I am grateful for all he taught me.

I thank my present colleagues Shweta, Rekha, Prabhat, Sunil, Gagan, Ruchi, Narendra, Vijay Bidisha and Alka for maintaining a cordial atmosphere in the lab. It was also a pleasure to interact with the youngsters who came to the lab for summer training, enriching me with their viewpoints. Working with Ankita was fun. Lab work would not have been such rewarding without the excellent technical and administrative assistance of Jeevanji, Sajjanji, Manojji and Rajesh. I am thankful to present and past members of Prof. Kasturi Dutta’s lab for their help whenever needed.

Interactions with Akanksha, Nitya, Neel, Manween, Dheeraj, Gopal, Tulika, Sudhanshu, Puneet, Sudesh, Sudesh, Vinod, Jayanand, Ujjwal have been a stimulating experience. My six years in JNU has been a rewarding time for friendships. A special mention goes to Tara, Pramod, Sugato, Sreedhar, Venky, Samar, Raman, Birju, Jassi for making my hostel stay comfortable.

I miss Saubiya’s presence here. I am grateful for all the help Sanjay has extended to me at great inconvenience to himself. I thank him for his help. Faisal lives in our thoughts.

It is indeed very difficult for me to express the spirit of camaraderie which me, Tuhina, Divya, Anurag and Devam share. They have been pillars of strength to me when everything was going wrong. I feel proud to share an absolutely wonderful friendship with them. People normally have single families. I am fortunate to have not one but at least four extended families. I will be forever grateful to Chachu and Chachi for taking very good care of me in my times of crisis.

Aai, Aji and Baba are deeply missed. Nothing can fill the void they left in my life. Avinash kaka remains in my memory. Lata kaku, Archana and Ajit kaka are cherished for their love and affection. Mitu tai is much more than my sister; she keeps my spirits flying high. She reminds me of George Orwell’s quote “Who controls the past controls the future: who controls the present controls the past”. Nikhil and Avinash make things wonderful. Lastly, I wish to sincerely thank all those people who have helped me with their love and affection but whom I may have forgotten to acknowledge through oversight or forgetfulness.

Abhijeet
