List of Tables

Table 3.7.1 Sequential Sampling Process ............................................................... 41
Table 3.10.1 Suggested Values of Confirmatory Factor Analysis .......................... 44
Table 3.10.2 Suggested Value of Reliability Analysis ........................................... 45
Table 3.10.3 Confirmatory Factor Analysis of HR Drivers .................................... 45
Table 4.2.1 Percentage Analysis of Type of Companies of Respondents ................. 55
Table 4.2.2 Percentage Analysis of Birth Place of Respondents ............................ 56
Table 4.2.3 Percentage Analysis of Birth Decade of Respondents .......................... 57
Table 4.2.4 Percentage Analysis of Gender of Respondents .................................. 58
Table 4.2.5 Percentage Analysis of Educational Qualification of Respondents ........ 59
Table 4.2.6 Percentage Analysis of Professional Qualification of Respondents ........ 60
Table 4.2.7 Percentage Analysis of Type of Family of Respondents ........................ 61
Table 4.2.8 Percentage Analysis of Designation of Respondents ........................... 62
Table 4.2.9 Percentage Analysis of Total Experience in the present Organisation of Respondents ................................................................. 63
Table 4.2.10 Percentage Analysis of Total Experience of Respondents .................... 64
Table 4.3.1 Mean and SD of Leadership Connect .................................................. 65
Table 4.3.2 Mean and SD of Work-life Balance ..................................................... 66
Table 4.3.3 Mean and SD of Job Enablement ....................................................... 67
Table 4.3.4 Mean and SD of Managerial Credibility .............................................. 68
Table 4.3.5 Mean and SD of Career Development ................................................. 69
Table 4.3.6 Mean and SD of Organization Brand ................................................. 70
Table 4.3.7 Mean and SD of Recognition and Benefits ......................................... 71
Table 4.4.1 Mean and SD of Employee Engagement ............................................. 72
Table 4.5.1 Mean and SD of Turnover Intention ................................................... 74
Table 4.6.1 Percentage Analysis of Level of HR Drivers ........................................ 75
Table 4.6.2 Percentage Analysis of Level of Employee Engagement ....................... 75
Table 4.6.3 Percentage Analysis of Level of Turnover Intention............................... 76
Table 4.7.1 t test for significant difference between male and female with respect to factors of HR Drivers, Employee Engagement and Turnover Intention ................................................................. 78
Table 4.7.2 t test for significant difference between Graduates and Postgraduates with respect to factors of HR Drivers, Employee Engagement and Turnover Intention ................................................................. 80
Table 4.7.3  t test for significant difference between Engineering and Non-Engineering education with respect to factors of HR Drivers, Employee Engagement and Turnover Intention .......................................................... 82
Table 4.7.4  ANOVA for significant difference among Type of company ........................................ 84
Table 4.7.5  ANOVA for significant difference among Birth Place ........................................... 86
Table 4.7.6  ANOVA for significant difference among Birth Decade .......................................... 88
Table 4.7.7  ANOVA for significant difference among Type of Family ........................................ 90
Table 4.7.8  ANOVA for significant difference among Designation ............................................ 93
Table 4.7.9  ANOVA for significant difference among Total Years of experience in present organisation ........................................................................................................ 96
Table 4.7.10 ANOVA for significant difference among Total Experience in Years ............................................................ 98
Table 4.8.1  Chi-square test for association between Level of HR Drivers and Level of Employee Engagement ........................................................................................................ 100
Table 4.8.2  Chi-square test for association between Level of HR Drivers and Level of Turnover Intention ........................................................................................................ 102
Table 4.8.3  Chi-square test for association between Level of Employee Engagement and Level of Turnover Intention ........................................................................................................ 104
Table 4.9.1  Friedman test for significant difference among mean ranks towards perception of Factors of HR Drivers ............................................................................................ 106
Table 4.10.1 Pearson Correlation Coefficient between Factors of HR Drivers ....................... 108
Table 4.10.2 Pearson Correlation Coefficient between Factors of Employee Engagement ........................................................................................................ 112
Table 4.10.3 Pearson Correlation Coefficient between factors of HR Drivers and Employee Engagement ........................................................................................................ 113
Table 4.10.4 Pearson Correlation Coefficient between factors of HR Drivers and Turnover Intention ........................................................................................................ 119
Table 4.10.5 Pearson Correlation Coefficient between Factors of Employee Engagement and Turnover Intention ........................................................................................................ 121
Table 4.11.1 Multiple Regression Analysis between HR Drivers and Turnover Intention ........................................................................................................ 123
Table 4.11.2 Multiple Regression Analysis between Employee Engagement and Factors of HR Drivers ........................................................................................................ 127
Table 4.11.3 Multiple Regression Analysis between Factors of Employee Engagement Turnover Intention ........................................................................................................ 130
Table 4.11.4  Multiple Regression Analysis between Factors of HR Drivers,
Employee Engagement and Turnover Intention........................................... 134
Table 4.12.1  Summary of Variables in the Structural Equation.......................... 138
Table 4.12.2  Variables in the Structural Equation Model Analysis.......................... 140
Table 4.12.3  Model Fit Summary ........................................................................ 142
