I find myself winding up an exhilarating journey of curiosity. These printed pages hold far more than the culmination of years of my doctoral sojourn. These pages reflect the relationship with many inspiring people I have met during my doctoral work. It is indeed a great pleasure for me to express my profound gratitude to these eminent yet approachable personalities who helped me to bring this humble endeavour to its fruitful completion.

I am grateful to almighty God, who provided me an opportunity and ability to accomplish the great task, who in every moment of my life, always blessed me beyond my imagination, helped me in every difficult time and gave me strength and perseverance. Whatever I am today is just because of him.

Mentors are like the light houses that guide you to the shore. I am lucky to have Dr. Monika Jain, Associate Professor (Food Science and Nutrition), Faculty of Home Science, Banasthali Vidyapith, as my esteemed mentor and guide. It was her intellectual landscape that gave me freedom to experiment. It was because of her expert guidance that I could hit the ground running when others would have been groping in the dark. I am extremely grateful to her for providing shape to my thoughts and ideas. She is a multifaceted personality who oriented me in many ways for my work. Her very meticulous and thorough appraisals of my work inspired me to work harder and learn many new things. She always stood by me compassionately whenever I required. With her I learned to labour patiently. Her scientific acumen, deep insight, intellectual guidance, persistent involvement, scholarly suggestions, constructive criticism, constant encouragement, affectionate behaviour and untirely support helped me cruise through most difficult periods. I am fortunate to have such a wonderful light house. As a beneficiary of her extreme intelligence and sharp insight no words of mine can express and encompass my sincere and deep feelings of gratitude and thankfulness that I have for her. Thank you ma’am from the bottom of my heart.

I would like to express my sincere and heartfelt thanks to Mr. Abdul Gaffar Kachara for sharing valuable opinions, insightful thoughts and his help in conducting and interpreting microbiological experiments. His blessings, affection, inspiration, and ready availability helped me to explore many things through academic and research pursuits.

My heartfelt thanks go to my best buddies Payal Jain and Ritu Bansal for showing me why friends are the most valuable assets in the world. Payal held my hand tightly whenever I tip-toed around potential pitfalls. Her refreshing outlook, accommodating nature, constructive suggestions and constant encouragement helped me to complete this thesis without too many problems. She never allowed me to feel low even during my phase of extreme stress. Ritu’s unceasing encouragement, friendship, support and helping hand make me upbeat even during the toughest times. A big thanks to both of you. I am also thankful to my friends, Preeti Verma, Ritushri Uniyal and Chetna Singh for their affection, co-operation and moral support throughout the work.
Finally, I acknowledge the sincere efforts of my family which has been the nucleus around which all my efforts have crystallized. No one can conquer without a strong base. I bow my head with great respect to my grandfather Late Dr. Chiranjeev Lal Gupta and my grandmother Smt. Pyari Bai Gupta and hope that this work makes you proud. Thanks for your blessings. Words would fail to express my heartfelt veneration and deep sense of admiration to my loving siblings Er. Surbhee Gupta and Saurabh Gupta for their love, affection, moral support, encouragement and help in every possible way to complete my thesis work. Their unwavering faith in me has always been a source of constant inspiration for me.

I express deep and heartfelt obligation to my parents Mrs. Archana Gupta and Dr. Lok Mani Gupta for their patience, cordial affection, will power, blessings, moral and social support and for being my driving force. Their love provided inspiration and motivation, without which this work would not have been completed. They are the real architects of my life. They inspired me to build castles when all I had was a fistful of sand. They always stood by me during all thick and thin. Without their support, patience, sacrifice, forebearance and unalloyed love, this study would never have seen the light of the day.

In the end, I want to express my sincere and deepest gratitude to everyone who, in their own way, directly or indirectly, have helped me to complete this thesis but could not have found separate names, so just in case: thank you to whom it may concern.
