DEDICATED TO

DAMIEN FOUNDATION (Belgium)
DECLARATION

The thesis "ECONOMIC EVALUATION OF LEPROSY CONTROL IN INDIA" (With Particular Reference to The Role of NLEP in North Arcot District), submitted by me for the DEGREE OF DOCTOR OF PHILOSOPHY is a record of independent research work done by me under the general guidance of Dr. (Mrs) K. SHANTHI. It has not formed the basis for the award to me of any degree, diploma, associateship, fellowship or other similar title.

J. Mohanasundaram

Signature of the Candidate
ACKNOWLEDGEMENT

I acknowledge with gratitude the encouragement given to me by Dr. U. Sankar, Professor and Head, Prof. A.M. Nalla Gounden, Former Head, Department of Econometrics, University of Madras.

I am immensely grateful to my guide Dr. (Mrs.) K. Shanthi, for her sustained encouragement, inspiration and valuable suggestions offered to me, throughout the period of my research work.

I owe my deepest sense of gratitude to Dr. E. Max, Professor of Econometrics, University of Madras, for introducing me to the important area of ‘Economics of Health’ in general and ‘Economics of Leprosy’ in particular.

I am immensely grateful to Padmashree Dr. Claire Vellut, Secretary in India, Damien Foundation (Belgium), for her critical comments on protocol of my research and making arrangements for my intensive training at Hemerijckx Leprosy Hospital and Training Centre, Polambakkam, and at Centre for Social Science Research on Leprosy, Gandhi Memorial Leprosy Foundation, Wardha (Maharashtra).

I owe my deepest sense of gratitude to Dr. V. Kandasamy, Miss. Pamela Rao, and other staff of Damien Foundation, for their sustained help, in providing me all possible assistance. The financial assistance of Damien Foundation (Belgium) to carry out this research work is gratefully acknowledged.

I place on record, my gratitude to Dr. Maa. Selvarasan, President, Madras University Teachers Association, for his sustained help, in providing me all possible assistance. My gratitude is also to Dr. S.S. Sivakumar, Dr. T.M. Srinivasan and all the faculty members of the Economics and Econometrics Department for their kind help and advice.

I acknowledge with thanks the help rendered by Dr. Vijaya Mohanan Pillai, Research Associate, Department of Econometrics, throughout the period of my research.

I would like to record my most profound gratitude to Dr. Sulochana, WHO Consultant (Leprosy), Dr. V. Ekambaram (WHO Consultant), Prof. M.S. Gore, Chairman, Dr. K.V. Desikan, Vice-Chairman, Dr S.P. Tare, Director, Gandhi Memorial Leprosy Foundation, Wardha, Prof. B.B.L. Sharma, Dept. of Health
Economics, National Institute of Health and Family Welfare, New Delhi, Dr. N.S. Dharmashaktu, Deputy Assistant Director General of Health Services (Leprosy), New Delhi, Prof. Mutatkar, Pune University, Dr. D. Lobo and Dr. Devanbu, GREMALTES Leprosy Hospital, Madras, Dr. Muliyl and Dr. K.R. John, Associate Professors in Dept. of Community Health and Prof. P.S.S. Rao, Head, Dept. of Bio-Statistics, Christian Medical College, Vellore, Prof. J. Ranganathan and Dr. Suresh Chandra, Dept. of Statistics, University of Madras, for guiding me to study the scientific developments in this area and enlightening me on the important dimensions of leprosy.

I am indebted to Dr. Mathew and Mrs. Mathew, New Delhi, for their help, constant encouragement and inspiration in completing this piece of work.

I am greatly indebted to my paternal uncle Mr. A. Deivasigamani, maternal uncles Mr. M. Ekambaram and Mr. M. Velmurugan, cousin brother Mr. M. Pandian and my younger brother Mr. S. Velmurugan, for their constant encouragement and fullest support given to me to go-ahead with my research work.

But for my mother and sisters, who tolerated my long absence from home and for the uninhibited support they have been giving me, including enabling me to catch the early morning bus to the field areas, this research work could not have taken shape at all. I am thankful to them.

My deepest sense of gratitude to Mrs. D. Sabitha, I.A.S., Special Secretary to the Chief Minister of Tamilnadu, for her hospitality in sparing much of her valuable time and helping me to collect relevant data from the Government. I am greatly indebted for her act of kindness.

I am immensely grateful to Prof. M.F. Lechat, Epidemiology Unit (WHO Collaborating Centre for the Epidemiology of Leprosy), School of Public Health, Catholic University of Louvain, Brussels, Prof. Anne Mills, London School of Hygiene and Tropical Medicine, London, for their critical comments on my research protocol and helping me by sending their research papers.

I also acknowledge the timely help and encouragement extended by my classmate and close family friend Mr. P. Gopalakrishnan, who assisted me financially. For his act of kindness, I remain greatly indebted throughout my life.

I record my sincere thanks to Mr. M.A. Ashraf Ali, Mr. M.A. Gafoor, Mr. Jazeem Mohammed, Advocate, High Court of Madras and Dr. Asheek
Mohammed, Ms. Leela, Mr. Jeyaraman, Mr. Thilakar and Mr. Amin, University of Madras, for their encouragement and help.

My competence in the field of 'Economics of Leprosy' has been recognised at the Workshop on Data Analysis and Interpretation in Social Sciences organized at Madras University in which the ICSSR (Southern Region) has given me a 'First Prize' for my research work, which inspired and induced me to carry out my research work effectively, efficiently and intensively. I am thankful to them.

To all the leprosy workers in India whom I contacted for the study, I wish to express my sincere thanks. I am grateful to the 454 leprosy patients and their families in the different study villages who educated me on the important social and economic aspects of leprosy and extended their cooperation in data collection in spite of their avocations and sufferings.

I also record my thanks to Mr. Gopalakrishnan, Chairman and Managing Director, Indian Bank, for the 'education loan' extended to me to complete the work.

My gratitude is also due to Mr. Manivasagam, Mr. Mukesh, Mr. Dhanapal, Mr. Muralikannan, Mr. Ilango, Mr. Selvakumar and Mr. Balasubramanian, Research Scholars, University of Madras, for their assistance during the preparation of this dissertation.

I am also thankful to the K.R.B.E. Printers especially Mr. D. Babu, for the neat typing done by him.

To all those who have been of help to me in one way or the other, I owe a word of thanks and crave their indulgence for not acknowledging their help individually.

CHAPTER I PROLOGUE

1.1 Introduction
1.2 Objectives of the Study
1.3 Methodology
1.4 Study Area
1.5 Study Design
1.6 Limitations
1.7 Organization of the Thesis

CHAPTER II SURVEY OF LITERATURE

Part I Studies on Health Economics

2.0 Introduction
2.1 Research in Health Economics Conducted in India
   2.1.1 Need and Demand
   2.1.2 Supply of Health Services
      2.1.2.1 Cost Studies in Hospitals
      2.1.2.2 An Overview of Cost Studies in Hospitals
   2.1.3 Economic Impact of Diseases
2.2 Research in Health Economics Conducted Outside India
   2.2.1 General Studies
   2.2.2 Cost-effectiveness and Cost-benefit of Vaccines
   2.2.3 Conclusion

Part II An Overview of Studies on Leprosy

2.3 Introduction
   2.3.1 Health Education in Leprosy
   2.3.2 Rehabilitation
   2.3.3 Epidemiological Studies
      2.3.3.1 Prevalence
2.3.3.2 Age Distribution
2.3.3.3 Age at Onset
2.3.3.4 Type Distribution
2.3.3.5 Sex Ratio
2.3.3.6 Deformity
2.3.3.7 Relapse
2.3.3.8 Studies on Contacts
2.3.3.9 School Survey
2.3.3.10 Self Healing Leprosy

2.3.4 Assessment of the Leprosy Control Programme
2.3.5 Social Science Research and Other Aspects

2.4 Conclusion

CHAPTER III Profile of NLEP at Macro and Micro Level

3.0 Introduction

Part I

3.1 Historical Background of Leprosy
3.2 Development of Anti-Leprosy Work in India
3.3 Anti-Leprosy Work in the State of Tamil Nadu
3.4 Magnitude of the Problem
   3.4.1 The World Leprosy Situation
   3.4.2 Leprosy in the South-East Asia Region
   3.4.3 Leprosy in India
   3.4.4 Leprosy in the State of Tamil Nadu
      3.4.4.1 Reliability of Epidemiological Data Collected
             in Tamil Nadu and North Arcot District
      3.4.4.2 Epidemiological Data on Leprosy Available
             at the State Level
      3.4.4.3 Physical Achievements of NLEP in Tamil Nadu

3.4.5 Leprosy in North Arcot District
   3.4.5.1 Salient Data About the District
   3.4.5.2 Population Coverage and Prevalence
   3.4.5.3 Basic Methodology of Work
   3.4.5.4 Selection of Patients for MDT
   3.4.5.5 Drug Regimen: For MB and PB Cases
   3.4.5.6 Surveillance After Discharge from Treatment
   3.4.5.7 Impact of MDT in North Arcot District
   3.4.5.8 Epidemiological Data at the District Level

3.4.6 Leprosy in Tiruvattupuram, GLCU
3.4.6.1 Epidemiological Data Collected Through the Circulated Proforma

3.5 School Survey

Part II Cost and Performance of NLEP

3.6 Introduction

3.7 Infrastructure Development During Plan Periods

3.8 Objective Performance under Five Year Plans

3.9 Expenditure of NLCP/NLEP during Five Year Plan Periods

3.10 Brief Review of Leprosy Control Work in India during Plan Periods
   3.10.1 First and Second Five Year Plans
   3.10.2 Third Five Year Plan
   3.10.3 Fourth Five Year Plan
   3.10.4 Fifth Five Year Plan
   3.10.5 Sixth Five Year Plan
   3.10.6 Seventh Five Year Plan
   3.10.7 Eighth Five Year Plan

3.11 Leprosy Control Work in Tamil Nadu under Five Year Plan
   3.11.1 First Plan
   3.11.2 Second Plan
   3.11.3 Third Plan
   3.11.4 Fourth Plan
   3.11.5 Fifth Plan
   3.11.6 Sixth Plan
   3.11.7 Seventh Plan
   3.11.8 Eighth Plan

3.12 Infrastructure
   3.12.1 Organizational Structure of NLEP in Tamil Nadu

CHAPTER IV Medical, Social and Legal Aspects of Leprosy and Significance of Health Education in Leprosy

4.0 Introduction

Part I

4.1 Medical Aspects of Leprosy
   4.1.1 Definition of Leprosy
   4.1.2 Epidemiology of Leprosy
      4.1.2.1 Descriptive Epidemiology
      4.1.2.2 Magnitude of the Problem
      4.1.2.3 Geographical Distribution
      4.1.2.4 Age Distribution
4.1.2.5 Sex Distribution
4.1.2.6 Race Distribution
4.1.2.7 Environment (Secondary Factors)
  4.1.2.7.1 Proximity of Contact and Duration
  4.1.2.7.2 Climate
  4.1.2.7.3 Rural / Urban Distribution
  4.1.2.7.4 Distribution According to Socio-Economic Status
  4.1.2.7.5 Distribution over Time

4.1.3 Determinants of Leprosy (Analytical)
  4.1.3.1 Causative Agent
  4.1.3.2 Source of Infection
  4.1.3.3 Mode of Transmission
    4.1.3.3.1 Contact Transmission
    4.1.3.3.2 Inhalatory (Airborne) Transmission
    4.1.3.3.3 Vector Transmission
    4.1.3.3.4 Ingestion
    4.1.3.3.5 Host Factors

4.1.4 Diagnosis
  4.1.4.1 Bacteriological Index
  4.1.4.2 Morphological Index

4.1.5 Immunology
  4.1.5.1 Defence Methods of the Body
  4.1.5.2 Mechanism of Immunity
    4.1.5.2.1 Humoral Immunity
    4.1.5.2.2 Cell Mediated Immunity
    4.1.5.2.3 Natural Immunity
    4.1.5.2.4 Acquired Immunity

4.1.6 Classification of Leprosy

4.1.7 Therapy of Leprosy
  4.1.7.1 Pre-Hydnocarpus Era
  4.1.7.2 Hydnocarpus Era
  4.1.7.3 Chemotherapy of Leprosy
    4.1.7.3.1 Dapsone Era
    4.1.7.3.2 Dapsone Resistant
    4.1.7.3.3 Primary Dapsone Resistance
    4.1.7.3.4 Secondary Dapsone Resistance
    4.1.7.3.5 Causes of Dapsone Resistance
  4.1.7.4 Multi Drug Therapy
    4.1.7.4.1 Rifampicin
4.1.7.4.2 Ciofaciiline (Lamprane)

4.1.8 Reactions in Leprosy

4.1.8.1 Reversal Reaction (Type 1 reaction)

4.1.8.2 Occurrence

4.1.8.3 Erythema Nodosum Leprosum (ENL) : Type II Reaction

4.1.9 Neuritis in Leprosy

4.1.9.1 Common Nerves Involved in Leprosy

4.1.10 Epidemiology of Deformities and Disabilities

4.1.10.1 Factors Influencing the Occurrence and Progress of Deformities

4.1.10.1.1 Factors relating to the patient

4.1.10.1.2 Factors relating to the disease

4.1.10.1.3 Other factors

4.1.10.2 Etiopathology of Deformity in Leprosy

4.1.11 Physiotherapy

4.1.11.1 Definition

Part II

4.2 Social Aspects of Leprosy

4.2.1 Social Status

4.2.2 Stigma of Untouchability and Leprosy Stigma

4.2.3 Cultural Aspect

4.2.4 Reaction of Society

4.2.5 Society, Leprosy and the Law

Part III

4.3 Significance of Health Education in Leprosy Control

4.3.1 Introduction

4.3.2 Interrupting the Transmission

4.3.3 Diagnosis

4.3.4 Treatment

4.3.5 Prevention of Deformities and Disabilities

4.3.6 Rehabilitation

4.3.7 Conclusion

CHAPTER V Integration of Leprosy Control Work with Primary Health Care (PHC)

5.1 Introduction

5.2 Present Need for Vertical Programme
5.3 Main Limitations Regarding the Implementation of Leprosy Control Through a Vertical Programme
5.4 Disadvantages of Vertical Programmes For Leprosy Control
5.5 Problem of Integration of Leprosy Into the General Medical Care
5.6 Pre-Requisites for Integration
5.7 Recommendations
5.8 Conclusion

CHAPTER VI

Part I Epidemiological and Socio-Economic Aspects - An Empirical Reality
6.0 Introduction
6.1 Demographic and Socio-Economic Characteristics of the Respondents
   6.1.1 Age and Sex Distribution
   6.1.2 Religion & Caste
   6.1.3 Type of Family
   6.1.4 Education
   6.1.5 Income
   6.1.6 Family Income
   6.1.7 Occupation
6.2 Disease Profile of the Respondents
   6.2.1 Distribution According to Type, Sex and Mode of Treatment
   6.2.2 Source of Detection
   6.2.3 First Symptom Noticed by the Patient
   6.2.4 Patient’s Knowledge About the Possible Source of Infection
   6.2.5 Age at Onset of Leprosy
   6.2.6 Cause for the Delay in Diagnosis
   6.2.7 Cause for the Delay in Taking Allopathy Immediately After Diagnosis
   6.2.8 Period of Primitive Medication
   6.2.9 Expenditure on Primitive Medication
   6.2.10 Duration of Illness
   6.2.11 Duration of Treatment Taken
   6.2.12 Regularity in Taking Treatment
   6.2.13 Reasons for Irregularity in Taking Treatment
   6.2.14 Side Effects of Drugs Consumed
   6.2.15 Distribution of Respondents According to Deformity Level
   6.2.16 Hospitalization and Surgery
   6.2.17 Average Annual Costs of Allopathy and Total Costs of Hospitalization, Surgery and Footwear
6.2.18 Technical Skills and Ability for Self Employment

6.3 Socio-Economic Consequences of Leprosy
6.3.1 Educational Problems
6.3.2 Individual and Familial Problems
   6.3.2.1 Effect of Leprosy on Marriage and Marital Life
6.3.3 Societal Problems
6.3.4 Economic Problems
   6.3.4.1 Change of Occupation and Economy
   6.3.4.2 Man days Lost Due to Leprosy
   6.3.4.3 Wages Lost on Account of Need to Collect the Drugs
   6.3.4.4 Earnings
   6.3.4.5 Period of Unemployment Due to Leprosy
6.3.5 Conclusion

Part II

6.4 Introduction
6.4.1 Economic Evaluation
6.4.2 Measurement of Productivity
6.4.3 Discrete Choice Models
   6.4.3.1 Probit and Logit Models
   6.4.3.2 Maximum - Likelihood Estimation
      6.4.3.2.1 Probit Model
      6.4.3.2.2 Logit Model
6.4.4 The Logit Model
6.4.5 The Earnings Model
6.4.6 Productivity Loss
6.4.7 Measurement of Cost Effectiveness
   6.4.7.1 Patient - Specific Treatment - Related Costs
   6.4.7.2 The Patient’s Perspective
   6.4.7.3 Mode of Treatment
   6.4.7.4 Deformity Grades

6.5 Conclusion

CHAPTER VII

EPILOGUE

Bibliography

Appendix: Glossary
LIST OF TABLES

1. Distribution of Registered Leprosy Cases by WHO Region, 1990
2. Leprosy Profile in South - East Asia
4. Areas of High Prevalence in India
5. Prevalence of Registered Leprosy Cases by State, in India, June 1990
6. Distribution of States and Union Territories by Leprosy Prevalence rate
7. Prevalence rate / 1000 before and after completion of Intensive Phase of M.D.T. in India
8. Statement showing the Districtwise Prevalence of Leprosy (1.3.90)
9. Aggregated State Level Epidemiological Data as on 31.6.1991 in Tamil Nadu
10. Physical Achievements of NLEP in Tamil Nadu
11. Performance of NLEP in 8 GLCUs in North Arcot District
12. Aggregated District level Epidemiological Data as on October 1990
14. Aggregated Unit Level Epidemiological Data - Tiruvellipuram GLCU
15. Sub-centrewise Epidemiological Data in GLCU - Tiruvellipuram
16. Performance of NLEP in GLCU Tiruvellipuram
17. Age, Sex and Typewise Among Living Cases in the 18 subcentres of GLCU, Tiruvellipuram, as on Oct. '90
18. Particulars of New Cases detected, after start of MDT in GLCU, Tiruvellipuram as on Sep.'90
19. School Survey Particulars in Tamil Nadu, North Arcot District, and Tiruvellipuram GLCU
20. Establishment of Infrastructure in different Five Years Plans
21. Number of Leprosy Units and Institutions of Any Kind Established or Functioning as on June '90
22. Staff Position and Training Status under NLEP in India as on March '90
23. Progress of Case Detection During Different Plans
24. NLEP in India : Performance in Case Detection, Treatment and Discharge between 1980-81 and 1989-90
25. Expenditure on Leprosy Control and Pattern of Assistance in Different Plans (India)
26. NLEP : Infrastructure in Tamil Nadu
27. Distribution of Respondents According to Age and Sex
28. Distribution of Respondents According to Religion & Caste
29. Distribution of Respondents According to Type of Family, Housing and Environment Condition
30. Distribution of Respondents According to Educational Status
31. Distribution of the Respondents by Earnings
32. Distribution of Families by Income
33. Change of Occupation and Economy
34. Distribution of Respondents According to Sex, Type and Mode of Treatment
35. Distribution of Respondents According to Mode of Treatment and Source of Detection
36. Distribution of Respondents According to Type and First Symptoms of Leprosy
37. Views of Patients About the Possible Source of Infection
38. Distribution of Respondents According to Sex and Age at Onset of Leprosy
39. Cause for the Delay in Diagnosis
40. Cause for the Delay in Taking Allopathy Immediately After Diagnosis
41. Period of Primitive Medication Before Taking Allopathy
42. Average Monthly Expenditure on Primitive Medication
43. Distribution of Cases According to Type and Total Period of Illness Till He/She Stopped Treatment
44. Distribution of Respondents According to Mode and Period of Treatment Taken in GLCU
45. Distribution of Respondents According to Mode of Treatment and Regularity in Taking Treatment
46. Reasons for Irregularity in Taking Treatment
47. Distribution of Cases According to Mode of Treatment and Side Effects
48. Distribution of Respondents According to the Condition of Body (WHO Scale)
49. Admission in the THW and Major Leprosy Hospital
50. Average Annual Costs of Allopathy
51. Total Cost of Hospitalisation & Surgery and Footwear
52. Distribution According to Technical Skills and Ability for Self Employment
53. Distribution of Respondents and Children in the Family by School Dropout
54. Distribution of Respondents According to Sex and Treatment Is Kept Secret
55. Distribution of Respondents by Familial Problems
56. Consequences to Married Life Due to Leprosy
57. Distribution of Respondents According to Social Consequences Due to Leprosy
58. Loss of Job Due to Leprosy
59. Distribution of Respondents by Mandays Loss Due to Leprosy
60. Wages Lost on Account of Need to Collect the Drugs
61. Distribution of Respondents According to Period of Unemployment Due to Leprosy
62. Definition of the Independent Variables
63. Summary Characteristics of the Variables
64. Logistic Model Results
65. Probability of Gainful Employment
66. Mean Probability of Gainful Employment
67. Probabilities of Gainful Employment Under Alternative Conditions
68. Earnings Profile
69. Earnings Model Results
70. Mean Monthly Earnings (Rs.)
71. Mean Monthly Earnings Under Alternative Conditions (Rs.)
72. Mean Productivity Loss Under Alternative Conditions (Rs. / Month)
73. Expected Monthly Earnings and Productivity Loss (Rs. / Month)
74. Distribution of Patients - Deformity-Gradewise and Treatment Modewise
75. Cross - Tabulation Among the Deformity Grades
76. The Sensitivity Model - Regression Results
77. The Effectiveness-Cost Ratios (at the Basic Cost Level)
78. Comparative Effectiveness-Cost Ratios (at the Basic Cost Level)
LIST OF FIGURES

1. Organizational Chart of NLEP in India
2. Race Distribution
3. Determinants of Leprosy (Analytical)
4. Contact Transmission
5. Types of Leprosy and Immunity
6. Classification of Leprosy
7. Etiopathology of Deformity in Leprosy
LIST OF MAPS

1. Prevalence of Registered Leprosy Cases in the World as at 31 October 1990.

3. Prevalence of Registered Leprosy Cases in Tamil Nadu as on 1.3.90.

4. Distribution of Leprosy Control Units in North Arcot District.

5. Distribution of Sub-centres in Tiruvettipuram Government Leprosy Control Unit.
