Abstract

Keywords

Notation and Abbreviations

1 Introduction

2. Literature Survey

2.1 Simulation study of voltage surge distribution in a Transformer winding

2.2 Summary of Literature Review

2.3 Objectives

3. Modeling of Transformer

3.1 Design of 3MVA Transformer Parameters

3.1.1 Continuous disc winding

3.1.2 Interleaved Winding

3.1.3 Shielded winding

3.1.4 Parameter Calculations for Disc, Interleaved & Shielded windings

3.2 Design of 1MVA Transformer Parameters

3.2.1 Parameter Calculations for Disc, Interleaved & Intershield windings

3.3 Modeling of lightning impulse generator

3.4 Modeling of VFTO generator

4. Results and Discussions

4.1 3MVA oil immersed transformer

4.2 1MVA (oil immersed) Transformer

4.3 3MVA Transformer with Different grading

4.4 Comparison charts of Lightning Impulse & VFTO responses

4.5 Electric stress analysis for Lightning impulse and VFTO Transients

4.5.1 3MVA Transformer subjected to Lightning Impulse

4.5.2 3MVA Transformer subjected to VFTO Transient

4.5.3 1MVA Transformer subjected to Lightning Impulse

4.5.4 1MVA Transformer subjected to VFTO Transient

4.6 Comparison charts of Published data and 1MVA
4.6.1 Comparison charts of Published data and 1MVA…………………….... 80
4.6.2 Comparison charts of Published data and 3MVA……………………… 81

5. SUMMARY AND CONCLUSIONS 84
