</table>
4.1 (II:A) Classification of Study Habits in terms of categories for male students studying in class X in Government Schools in East and South districts of Sikkim (N=346)  
4.1 (II: A) (i) Description of male students of class X with regards to the various components of Study Habits  
4.1 (II: B) Classification of Study Habits in terms of categories for female students studying in class X in Government Schools in East and South districts of Sikkim (N=474)  
4.1 (II: B) (ii) Description of female students of class X with regards to the various components of study habits  
4.1 (II: C) Classification of Study Habits in terms of total number of students studying in class X in Government Schools in East and South districts of Sikkim (N=820)  
4.1 (II: C) (iii) Description of total number of students (male & female) of class X with regards to the various components of study habits  
4.1 (III) Showing the distribution of Scores on Academic Achievement in Mathematics for students studying in class X (N=820)  
4.2 (A) Showing the Co-efficient of Correlation between Attitude towards Mathematics and Academic Achievement in Mathematics of class X students  
4.2 (B) Showing the Co-efficient of Correlation between Study Habits and Academic Achievement in Mathematics of class X students
4.3 Showing the difference between High and Low Achievers with respect to the Attitude towards Mathematics
4.3(a) Showing the difference in the attitude towards mathematics with respect to Wider Applicability between high and low achievers
4.3(b) Showing the difference in the attitude towards mathematics with respect to Development of Skills between high and low achievers
4.3(c) Showing the difference in the attitude towards mathematics with respect to Reasoning between high and low achievers
4.3(d) Showing the difference in the attitude towards mathematics with respect to Objectivity between high and low achievers
4.3(e) Showing the difference in the attitude towards mathematics with respect to Intellectual Development between high and low achievers
4.3(f) Showing the difference in the attitude towards mathematics with respect to Non-intellectual Development between high and low achievers
4.3(g) Showing the difference in the attitude towards mathematics with respect to Individual Outlook between high and low achievers
4.3(h) Showing the difference in the attitude towards mathematics with respect to Universal Outlook between high and low achievers
4.4 Showing the difference between High and Low Achievers with respect to the Study Habits
4.4(a) Showing the difference in the study habits with respect to Home Environment & Planning between high and low achievers 95

4.4(b) Showing the difference in the study habits with respect to Reading & Note-taking between high and low achievers 96

4.4(c) Showing the difference in the study habits with respect to Planning of Subjects between high and low achievers 96-97

4.4(d) Showing the difference in the study habits with respect to Habits of Concentration between high and low achievers 97

4.4(e) Showing the difference in study habits with respect to Preparation for Examination between high and low achievers 98

4.4(f) Showing the difference in the study habits with respect to Habits & Attitudes between high and low achievers 99

4.4(g) Showing the difference in the study habits with respect to School Environment between high and low achievers 100

4.5 Showing the Mean, SD, Mean Difference and z-value for Male and Female students within High and Low Achievers with respect to their Attitude towards Mathematics 101

4.6 Showing the Mean, SD, Mean Difference and z-value for Male and Female students within High and Low Achievers with respect to their Study Habits 103
