Acknowledgement

It gives me immense pleasure in being able to submit this Ph. D. thesis. I would like to express my countless gratitude to 'GOD' who gave me the inspiration, health and strength throughout the pursuit to achieve a long cherished dream.

On the completion of this Herculean task, the first person I must acknowledge from the core of my heart is none other than my guide Dr. Arvind K. Nikumbh, Professor in Inorganic Chemistry, Department of Chemistry, Savitribai Phule Pune University, Pune. His wide knowledge and logical way of thinking has been of great value for me. During these five years I have known him as a sympathetic and principle centered person, I have short of words to thanks him for his unlimited patience, affection and motherly attitude towards me during my entire research work. With feeling of profound gratitude I can say that the credit of this work goes to a great personality in his self. His overwhelming enthusiasm, integral view on research and his mission of providing “only high quality work & not less” has made a deep impression on me. My feeling of respect for him is increasing day by day. I am fortunate to have such a nice person as my guide who made my research life smooth & rewarding for me. It is his beautiful nature that has established a bond of “Guru-Shishya” between us that I would love to cherish throughout my life.

I am thankful to Head, Department of Chemistry, Savitribai Phule Pune University, Pune for providing me the research facilities and encouragement. I wish to thank all the teachers in Inorganic Chemistry, Chemistry Department, Savitribai Phule Pune University, for their kind cooperation.

I would also like to take this opportunity to thank Principal Dr. S.G.Pardeshi, Fergusson College, Pune for their valuable cooperation and granting me necessary permission to complete the research work. I am also thankful to Prof. S.M.Vhankate, Head Department of Chemistry and all my colleagues and non-teaching staff of Fergusson College, Pune for their help and encouragement.
I will be failing in my duty if I do not record here my appreciation and heartful thanks to all my research colleagues and friends for providing pleasant and encouraging atmosphere to work with. Without their support, this would not have taken its present shape.

My special thanks to the family members of Professor A. K. Nikumbh, his wife Mrs. Latatai Nikumbh and his daughters Dr. (Mrs.) Neelasha and Miss Ashwini Nikumbh for kind care taken by them about me and concerns about my future.

During the entire period of my Ph.D. research works many people have helped me knowingly or unknowingly, it may not be possible to name them all but it is definitely possible to thank all those who have made this research possible.

I should not forget blessing of my father-in law Mr. Sadashiv Unde, mother-in law Mrs. Kanta Unde, sister-in law Sou. Tejashree Mhase, my sisters Sou. Vaishali Mhaske, Sou. Rupali Thombare, brother Vishal Karale and his wife Anjali karale and all my relatives.

I admit, I do not know as to how I can express my deepest heartfelt gratitude towards my father Shri. Jagannath Ganpat Karale and my mother Mrs. Manda Jagannath Karale whose unstained support and enabled me to crawl to reach the present level of uphill task.

Finally, I would like to express my deep appreciation to my husband, Mr. Jayant Unde for his understanding, inspiration and patience throughout the tenure of my Ph. D. work. I would like to apologize to my son Master Akshit, a bundle of joy, for many hours and months, which I have spent on this work instead of being with him.

Department of Chemistry,
Savitribai Phule Pune University,
Pune - 7
June - 2016
(Ms Neeta Jagannath Karale)
