List of Figures

Figure 1.1  Concrete as a five phase system, 2
Figure 1.2  Artificial neuron model, 6
Figure 3.1  Screenshot of concrete mix details, requirements and specifications, 27
Figure 3.2  Screenshot of sieve analysis of fine aggregates, 28
Figure 3.3  Screenshot of sieve analysis of coarse aggregates, 29
Figure 3.4  I.S.I. method of concrete mix design, 30
Figure 3.5  Screenshot of output of I.S.I. method of concrete mix design, 31
Figure 3.6  A.C.I. method of concrete mix design, 32
Figure 3.7  Screenshot of output of A.C.I. method of concrete mix design, 33
Figure 3.8  D.O.E. method of concrete mix design, 34
Figure 3.9  Screenshot of output of D.O.E. method of concrete mix design, 35
Figure 4.1  Conceptual framework of fuzzy inference system, 40
Figure 4.2  Five layer fuzzy inference system [ACI Method], 42
Figure 4.3  CMD-Layer-1 antecedent input-1 [required strength], 43
Figure 4.4  CMD-Layer-1 antecedent input-2 [degree of quality control], 43
Figure 4.5  CMD-Layer-1 consequent output-1 [target strength], 43
Figure 4.6  Rulebase layer-I, 44
Figure 4.7  CMD-Layer-II antecedent input-2 [target strength], 45
Figure 4.8  CMD-Layer-II antecedent input-1 [durability], 45
Figure 4.9  CMD-Layer-II consequent output-1 [WCR], 45
Figure 4.10 Rulebase layer-II, 46
Figure 4.11 CMD-Layer-III antecedent input-2 [msa], 47
Figure 4.12 CMD-Layer-III antecedent input-3 [workability], 47
Figure 4.13 CMD-Layer-III antecedent input-2 [target strength], 47
Figure 4.14 CMD-Layer-III consequent output-1 [water content], 48
Figure 4.15 CMD-Layer-III consequent output-2 [concrete density], 48
Figure 4.16  Rulebase layer-III, 49
Figure 4.17  CMD-Layer-IV consequent output-1 [WCR], 49
Figure 4.18  CMD-Layer-IV antecedents input-3 [water content], 50
Figure 4.19  CMD-Layer-IV consequent output-1 [cement content], 50
Figure 4.20  Rulebase layer-IV, 51
Figure 4.21  CMD-Layer-V antecedent input-1 [msa], 51
Figure 4.22  CMD-Layer-V antecedent input-2 [fineness modulus], 52
Figure 4.23  CMD-Layer-V antecedent input-3 [workability], 52
Figure 4.24  CMD-Layer-V consequent output-1 [CA-Fact], 52
Figure 4.25  Rulebase layer-V, 53
Figure 4.26  Water content estimation by ACI and Fuzzy method, 54
Figure 4.27  Cement content estimation by ACI and Fuzzy method, 55
Figure 4.28  Coarse aggregate content estimation by ACI and Fuzzy method, 55
Figure 4.29  Water content estimation by ISI and Fuzzy method, 56
Figure 4.30  Cement content estimation by ISI and Fuzzy method, 57
Figure 4.31  Total aggregate content estimation by ISI and Fuzzy method, 57
Figure 4.32  Water content estimation by DOE and Fuzzy method, 58
Figure 4.33  Cement content estimation by DOE and Fuzzy method, 59
Figure 4.34  Total aggregate content estimation by DOE and Fuzzy method, 59
Figure 5.1  Five layer artificial neural network system [ACI Method], 64
Figure 5.2  Screenshot of NeuroXL predictor based ANN, 73
Figure 5.3  Water content estimation for different grades of concrete, 74
Figure 5.4  Cement content estimation for different grade of concrete, 75
Figure 5.5  Total aggregate content estimation for different grade of concrete, 75
Figure 5.6  Water content estimation for different grades of concrete, 76
Figure 5.7  Cement content estimation for different grade of concrete, 77
Figure 5.8  Total aggregate content estimation for different grade of concrete, 77
Figure 5.9 Water content estimation for different grades of concrete, 78
Figure 5.10 Cement content estimation for different grade of concrete, 79
Figure 5.11 Total aggregate content estimation for different grade of concrete, 79
Figure 6.1 Screenshot of ideal particle grading curves, 86
Figure 6.2 Screenshot of mix requirement and materials specification, 91
Figure 6.3 Screenshot of particle grading analysis of fine aggregates, 92
Figure 6.4 Screenshot of particle grading analysis of coarse aggregates, 93
Figure 6.5 Screenshot of combined particle grading curves, 94
Figure 6.6 Screenshot of particle shape factor, 95
Figure 6.7 Screenshot of paste layer theory cement estimation, 95
Figure 6.8 Screenshot of concrete ingredients estimation, 96
Figure 6.9 Screenshot of required parameter value, 96
Figure 6.10 Screenshot of estimated parameter value, 97
Figure 6.11 Trial batch concrete strength prediction based on cement, 98
Figure 6.12 Trial batch concrete strength prediction based on CWR, 98
Figure 6.13 Trial batch concrete slump prediction based on water, 99
