List of Tables

Table 3.1  Basic parameters used in the design stipulations, 26
Table 3.2  Basic parameters used in the material specifications, 26
Table 3.3  Concrete mix design parameters by conventional methods, 36
Table 3.4  Comparison of methods of concrete mix design, 36
Table 3.5  Parametric relation of concrete mix design and research scope, 37, 38
Table 4.1  ACI Design mixes calculated for 1m$^3$ of concrete by FIS, 54
Table 4.2  ISI Design mixes calculated for 1m$^3$ of concrete, 56
Table 4.3  DOE Design mixes calculated for 1m$^3$ of concrete by FIS, 58
Table 4.4  Concrete mix design parameters by conventional methods, 60
Table 4.5  Concrete mix design parameters by fuzzy method, 60
Table 5.1  Layer-I input strength, 65
Table 5.2  Layer-I input standard deviation, 65
Table 5.3  Layer-I output target strength [N/mm$^2$], 66
Table 5.4  Layer-II-A input grade of concrete and output WCR, 67
Table 5.5  Layer-II-B input durability and output WCR, 68
Table 5.6  Layer-III input MSA and workability, 69
Table 5.7  Layer-III output water content, 69
Table 5.8  Layer-IV input MSA and workability, 70
Table 5.9  Layer-IV output coarse aggregate content, 70, 71
Table 5.10 Layer-V Estimation of density of fresh concrete, 72
Table 5.11 ACI Design mixes calculated for 1m$^3$ of concrete, 73, 74
Table 5.12 ISI Design mixes calculated for 1m$^3$ of concrete by ANN, 76
Table 5.13 DOE Design mixes calculated for 1m$^3$ of concrete, 78
Table 5.14 Concrete mix design parameters by conventional methods, 80
Table 5.15 Concrete mix design parameters by ANN method, 80
Table 6.1  Strength classification and codification, 83
Table 6.2  Workability classification and codification, 83
Table 6.3  Exposure conditions [durability] classification and codification, 83
Table 6.4  Density of mix classification and codification, 85
Table 6.5  Particle shape factor, 87
Table 6.6  Mix strength requirement parameters guidelines, 88
Table 6.7  Mix workability requirement parameters guidelines, 88
Table 6.8  Mix durability requirement parameters guidelines, 89
Table 6.9  Mix density requirement parameters guidelines, 89
Table 6.10 New method and conventional method outputs for M20, 101
Table 6.11 New method and conventional method outputs for M40, 102
Table 6.12 New method and conventional method outputs for M60, 102
Table 6.13 Strength validation of concrete mix, 103
Table 6.14 Workability validation of concrete mix, 103
