ACKNOWLEDGEMENT

First of all, I would like to express my deepest gratitude to my research guide Dr. R. Mohan, Professor, Department of Chemistry, Anna University, for his guidance, suggestions, helpful discussions, advices and constant support throughout the course of my Ph.D work.

I would like to express my deepest sense of gratitude to Dr. R. Maheswari and Dr. R. Anand Center for Environmentally Beneficial Catalysis (CEBC) Research, The University of Kansas, USA for constant encouragement, invaluable suggestions and support in many ways helped me a lot to think, to construct and complete the work and to focus my views in the proper perspective.

I would like to express my deepest gratitude to Dr. G.R. Rajarajeswari, Assistant Professor (Sr.Gr.) Department of Chemistry, Anna University, for her guidance throughout my research career.

I would like to thank Dr. A. Pandurangan, Professor and Head, Department of Chemistry, Anna University for giving me the permission to avail the laboratory facilities. I would like to express my gratitude to the former, Head of the Department Dr. P. Kannan Professor and Dr. V. Sadasivam, Professor, Department of Chemistry, Anna University for providing all facilities. My sincere thank goes to my doctoral committee members Dr. S. N. Jaisankar, Scientist(CLRI) and Dr. M. J. Umapathy, Assistant Professor (Sr.Gr), Department of Chemistry, Anna University, for their valuable suggestions throughout my research career.

My deepest thanks to all my Friends and colleagues, without their helps and supports it is not possible complete this work.

Finally, I owe so much to my parents, who were always there standing by me and encouraging me with love, understanding and patience in the good times and bad. Finally, I would like to acknowledge DST-FIST, UGC–Meritorious Fellowship scheme for instrument facility and financial support.
