Chapter – 1
INTRODUCTION ......................................................................................1

1.1 Introduction .............................................................................................1
1.2 Statement of the Problem .......................................................................4
1.3 Objectives of the Study ...........................................................................5
1.4 Hypotheses .............................................................................................6
1.5 Research Methodology ............................................................................6
1.5.1 Quantitative Methods .............................................................................6
1.5.1.1 Selection of Sample for Collecting Primary Data ..........................7
1.5.1.2 Secondary Data ...................................................................................9
1.5.2 Qualitative Research ............................................................................9
1.6 Theoretical Framework ...........................................................................10
1.7 Tools for Data Analysis .........................................................................13
1.8 Significance of the Study .......................................................................14
1.9 Concepts and Definitions .......................................................................14
1.10 Limitations ...........................................................................................15
1.11 Chapterisation .....................................................................................16
Work cited .....................................................................................................17

Chapter – 2
REVIEW OF LITERATURE ..........................................................................18

2.1. Introduction ............................................................................................18
2.2. Studies on Impact of Irrigation Management in Crop Productivity and Income of the Farmers ..........................................................19
2.3 Studies on Organizational Aspects and Operational Constraints in the Irrigation Development in India. .........................................................26
2.4 Under-utilisation of Irrigation Potential ..................................................28
2.5 Cost and Time Overruns in Irrigation Development ..............................29
2.6 Problems in Water Distribution and Management ..................................32
2.7 Studies on Environmental Implications of Irrigation Development ........34
2.8 Institutional Reforms in Indian Irrigation ..............................................36
2.9 Conclusion ............................................................................................39
Bibliography .................................................................................................40
Chapter – 3
IRRIGATION SCENARIO IN INDIA AND KERALA

3.1 Introduction

3.2 Irrigation Scenario in India

3.2.1 Plan-wise Development of Irrigation

3.2.2 Development and Utilization of Irrigation Potential

3.2.3 State-wise Development of Irrigation Potential Created and Utilized

3.3 Irrigation Scenario in Kerala

3.3.1 Trend in Plan-wise Investment on Irrigation in Kerala

3.3.2 Plan-wise Achievement of Irrigation Potential Created and Utilized

3.3.3 Pattern of Irrigation (Source-wise) in Kerala

3.3.4 Gross Area under Irrigation – (Crop-wise 2009-2010)

3.3.5 Net Area Irrigated (Source-wise 2009-10)

3.3.6 Long Term Trend in the Cropping Pattern in Kerala

3.3.7 Area, Production and Productivity of Crops in Kerala (1970-2010)

3.4 Irrigation Projects in Kerala

Works Cited

Chapter – 4
THE PAMPA IRRIGATION PROJECT

4.1 Introduction

4.2. Description of the study area

4.3 Salient Features of the PIP

4.4 Context of PIP

4.5 Objectives of the Pampa Irrigation Project

4.6 Other Benefits

4.7 Alignment of Canals

4.8 Design of canals

4.9 The Ayacut Details

4.10 Extent of Irrigation Lands

4.11 Cropping Pattern in the Project Area Before and After PIP

4.12 Irrigation Intensity
## 5.1 Introduction

### 5.2 Socio-economic Profile of Households

#### 5.2.1 Demographic Profile of the Households

- Distribution of respondents: Catchment area wise
- Gender Wise Distribution of Farmer Households
- Size of Farmer Households
- Age Wise Distribution of Beneficiaries

#### 5.2.2 Level of Educational attainment of farmer households

#### 5.2.3 Economic Status of the PIP Beneficiaries

### 5.3 Land Use and Cropping Pattern of the Households

#### 5.3.1 Nature of Land Ownership

#### 5.3.2 Cropping Pattern in the Catchment Area

### 5.4 Conclusion

### 5.5 Impact of the Pampa Irrigation Project

#### 5.5.1 Area of Paddy Cultivation before and after the PIP (Catchment-wise)

#### 5.5.2 Area of Tapioca Cultivation before and after the PIP (Catchment-wise)

#### 5.5.3 Area of Vegetables Cultivation before and after the PIP Catchment-wise

#### 5.5.4 Area of Sugarcane Cultivation before and after PIP (Catchment-wise)

#### 5.5.5 Area of Rubber Cultivation before and after the PIP (Catchment-wise)

#### 5.5.6 Area of Coconut Cultivation before and after the PIP (Catchment-wise)

#### 5.5.7 Conclusion

### 5.6 Impact of PIP on the Yield, Productivity and Profitability of Different Crops

#### 5.6.1 Impact of PIP on the Yield, Income and Productivity of Paddy

#### 5.6.2 Impact of PIP on the Yield, Income and Productivity of Tapioca

#### 5.6.3 Impact of the PIP on the Yield, Income and Productivity of Vegetables

#### 5.6.4 Impact of the PIP on the Yield, Income and Productivity of Sugarcane

#### 5.6.5 Impact of PIP on the Yield, Income and Productivity of Rubber

#### 5.6.6 Impact of PIP on the Yield, Income and Productivity of Coconut

### 5.7 Regression Model
5.7.1 Conclusion ........................................................................................................ 137

5.8 Factor Analysis ..................................................................................................... 138

5.8.1 Result of Factor Analysis (Principal Component Analysis) of Management of the PIP ........................................................................................................ 138

5.8.1.1 Proper Utilization of Available Water Resources ........................................ 144

5.8.1.2 Monitoring by the PIP Staff .......................................................................... 145

5.8.1.3 Shortage of Water Availability Due to Top Management Lapses ...................... 145

5.8.1.4 Maintenance of Canal System ........................................................................ 147

5.8.1.5 Shortage of Water Due to Site Specific Issues ............................................. 148

5.8.1.6 Shortage of Proper Water Supply System ........................................................................ 149

5.8.1.7 Water pricing and its quality ......................................................................... 150

5.8.1.8 Issues Related to the timing of Water Supply .............................................. 151

5.8.1.9 Conclusion ..................................................................................................... 151

5.9 Focus Group Discussion .................................................................................... 153

5.9.1 Positive Impacts .............................................................................................. 155

5.9.2 Negative Impacts ............................................................................................ 155

5.10 Case Studies ..................................................................................................... 157

5.10.1 Case Study I (Head region) .......................................................................... 157

5.10.2 Case Study-II (Middle region) ....................................................................... 158

5.10.3 Case Study-III (Tail Region) ......................................................................... 160

5.10.4 Summary of Case Studies ............................................................................. 162

Works Cited ............................................................................................................. 163

Chapter – 6

FINDINGS, CONCLUSION AND SUGGESTIONS ................................................. 164

6.1. Introduction ...................................................................................................... 164

6.2. Findings Based on the Objectives: ................................................................. 164

6.2.1 Findings Based on the First Objective: ....................................................... 165

6.2.2 Findings Based on Second Objective: ......................................................... 166

6.2.3 Findings Based on the Third Objective: ....................................................... 167

6.2.4 Findings Based on the Fourth Objective: ..................................................... 168

6.2.4.1 Findings Based on the Focus Group Discussion: ..................................... 169

6.2.5 Findings Based on the Fifth Objective: ......................................................... 169

6.2.6 Findings Based on Case Studies: ................................................................. 170

6.3 Theoretical Implications ................................................................................... 171
