ACKNOWLEDGEMENT

With a deep sense of gratitude, I acknowledge my sincere thanks to my supervisor Dr. Mamta Rani, Associate Professor & Head, Department of Computer Science, Central University of Rajasthan for her cautious and meticulous guidance. She has been a source of inspiration for me who is full of new ideas. She helped me in all possible ways in spite of her hectic schedule. I hope, her valuable suggestions would continue to enlighten my further path of progress.

Fractals and chaos are one of the main frontiers of science, and chaos control is an important problem. I have been highly motivated and benefited by incredible books of Prof. H. O. Peitgen, Prof. H. Jurgen, Prof. D. Saupe, Prof. R. Holmgren, Prof. M. F. Barnsley and Prof. R. L. Devaney. The books written by above Professors gave me a strong foundation, and helped in developing a good comprehension of the subject. I dedicate this thesis to above Professors.

I am very much thankful to Prof. S. L. Singh, Professor Emeritus (UGC Fellow), Retd. Professor, Gurukula Kangri Vishwavidyalaya, Haridwar, Uttarakhand. Professor Singh always helped me in technical work promptly. His fast help always kept my motivation on higher end. I express my deep gratitude towards him.

I am extremely thankful to Prof. A. P. Singh, Central University of Rajasthan who helped me by his continuous valuable suggestions for improvement in work and also gave me administrative support in all possible ways. I find myself lucky as I could get words of advice from his ocean of knowledge.

I also want to thank Dr. D. C. Sharma, Dean, School of Mathematics, Statistic and Computational Sciences for letting my defense be an enjoyable moment, and for his
comments and suggestions. I feel pleasure to remember Dr. A. K. Gupta, Dean Research for his administrative advices and support. I take privilege to thank DRC members, Prof. M. D. Shrimali and Dr. A. Nagaraju for their suggestions at many stages, which opened up new directions for my research work.

I express my deep gratitudes towards Dr. Nishtha Kesswani, Mr. Ravi Raj Choudhary, Mr. Gaurav Meena, Mr. Sanjay Anand and Mr. Vinod Kumar, the faculty members of Department of Computer Science for their kind help, co-operation and making my stay enjoyable throughout the study period.

I am thankful to Mr. Sanjay Joshi, Mr. Naresh Mangal and Mr. Vivek Vyas for providing support in computer lab. Thank you very much to Mr. Satyanarayan Solanki and Mr. Ashish Chaturvedi, who helped me during the course of my research work in different ways.

I am extremely thankful to Dr. Pooja Rani Sharma, PDF, Department of Physics, Central University of Rajasthan and my co-research scholars Garima Tomar, Sanjay Lamba, Ketan Jha, Amit Singh, Jyotsna Verma, Deepak and Shelendra Kumar Jain for insightful comment, constructive criticism and long discussions that helped me to sort out the technical details at different stages of research work.

I feel proud of my parents Mr. Krishan Kumar Yadav and Mrs. Savita Yadav and my in-laws Mr. Tejpal Singh Yadav and Mrs. Sarita Devi who not only supported me but also inspired me as a teacher and assisted as a friend. I must acknowledge assistance and moral support of my husband Mr. Madan Yadav for completion of my work in short time. Finally, I acknowledge the warmthness of smile of my daughter Charvi and my Sister Mrs. Kavita Yadav which used to refresh me.

ANJU YADAV
