ACKNOWLEDGEMENTS

‘Why anyone should think that it is always the brick wall that is going to last when one bangs his head into it? ‘

I always remembered this quote in my profession, more so when I had determined to complete my PhD at this stage of my career! Honestly I wanted that to be a determination and not just a destiny! I am grateful to AISECT University for turning my aspiration towards achievement.

I trust what motivates a research scholar to indulge in an exhausting but fruitful years of the research period are the interaction, association, guidance and support of few relevant but important persons and entities. At this juncture I would like to express my sincere gratitude to them.

I am thankful to Prof VK Verma, Vice chancellor of the University for the Opportunity given and sustained encouragements provided. I never felt any procedural delays or hardship during these years. Every research scholar was encouraged in publishing papers to presentation with series of conferences and internal research journal.

I would like to mention few words about Prof TK Bandopadyay in beginning only. It was he who after seeing my industry background and my earlier acquaintance with him suggested this broad topic for my research and provided necessary tips.

I was fortunate to have had Dr RP Gupta supervising my research work and without his able guidance and support this thesis would not have been completed. He helped me to capitalize on my ideas and frame them into solid research work during this period. He had an eye for details and that refined my work further. I never felt that time was a constraint during this period and he was always available and contactable even at very short notice for discussions. I was alerted well in time about every forthcoming conference for relevant paper presentations. His positive approach and simple nature had taken pressure off from me and I could enjoy the work. His fibre optic industry background was an added asset to the research work.

My profound gratitude extends to the research coordinating team of AISECT University comprising of Dr Deepti Maheshwari, Ms Sangeeta jauhari and their associated staff. It was really a customer care team addressing every need of research scholars – the customers.
Initial uncertainties were very smoothly handled by this team providing utmost satisfaction to every research scholar. I am running out of words to express my sincere thanks to Ms Sangeeta Jauhari for having accommodated the request of working individuals to run course work on few Sundays too!!

I would like to acknowledge the help once in a way rendered by my colleagues namely Prof Rajesh Rai, Prof Umesh Hada, Prof Abhishek Asthana, Prof Prashant Yadhav, and Prof P N Suman during these days for MATLAB setup, running and occasionally trouble shooting OptiSim/ OPTIFDTD software etc.

I am indebted to AICTE for awarding grant after evaluation of my research proposal under RPS scheme which aided me to get few software facilities for this work.

In this relatively new field of MOF the support of research community with essential but expensive infrastructure is very essential. I was fortunate to have obtained the support of Dr RK Sinha [DTU], Dr SK Bhadra, CGCRI [Kolkata], Dr BP Pal [IIT Delhi] and Dr Rama Chari [CAT] for visits, interactions and observations.

My family members deserve applause for their perseverance.

G. KUMAR
