ACKNOWLEDGEMENTS

“God doesn't require us to succeed; he only requires that you try”

— Mother Teresa

First of all, I would like to express profound sense of obligations to the “OMNIPOTENT” for showering colossal blessings on me, which made me to realize this academic project. Next I would like to avail privilege to express my heartiest sense of reverence and immense regards to my parents Er. O. P. Jindal and Smt. Sheela Rani whose utmost affection, blessings, moral support and endless sacrifices made me competent enough to achieve this ambition.

The precious gift of learning is a debt that is difficult to pay; only gratitude can be felt. Indeed, the words at my command are inadequate in the form or in sprit to express my heartfelt, deep sense of unbound gratitude and indebtedness to my supervisors Dr. N. P. Mehta, Pro Vice-Chancellor, Maharishi Markandeshwar University, Mullana (Ambala) and Dr. Rahul Chhibber, Assistant Professor, Indian Institute of Technology Jodhpur, Jodhpur for laying out the guidelines of research work and providing training to me to think systematically and logically. I have real appreciation and regard for their keen interest, scholarly and judicious guidance, whole hearted ever available and untiring help, painstaking efforts and sense of forgiveness throughout my association with them.

I am thankful to Mr. N. K. Batra, Associate Professor and Head, Department of Mechanical Engineering, MMEC, Mullana (Ambala) for his timely recommendations, suggestions, support and for providing necessary departmental facilities, services and peaceful ambience for research work. My sincere thanks are due to Sh. Ram Saran, Technical Assistant–Production Technology Lab, MMEC, Mullana for his technical assistance during the development of setup and experimental work. I would like to
acknowledge the financial support, library facilities especially DELNET provided by Maharishi Markandeshwar University, Mullana (Ambala). I am also thankful to Dr. K.L. Hansda, Scientist E-II, Business Development & Monitoring Division, National Metallurgical Laboratory, Jamshedpur for providing infrastructural facilities and allowing student concession for availing the facilities. I want to give sincere thanks to Sh. Himashu Bapari (Technical Assistant, NML, Jamshedpur) for his help in analysis work. Further, I would like to thank all my department colleagues for their timely suggestions and support. I will also take this opportunity to express my special thanks to my beloved wife, Mrs. Meenu Jindal for her help in experimental work, continuous encouragement, personal support and great patience all the times. The scarification she paid for me by sharing my entire burden and taking care of me and whole family. My sincere apologies to my wife and my beloved daughters, Poorva and Rizul and loving son Manit for the moments which I could not share with them which may not be compensated any way. My deep sense of feelings and thanks to my dear brother Mr. Pardeep Jindal (Assistant Professor - Department of Mechanical Engineering, Yadavindra College of Engineering, Pbi. Univ. Guru Kashi Campus, Talwandi Sabo-Bathinda) for his help in characterization, moral support and affectionate love to me. I pay sincere regards to my In-laws Sh. Hari Om Garg and Smt. Darshna Devi whose desire always inspired me to complete this work. The list is long enough that it’s difficult to include each and every name to whom I want to thank for their assistance and moral support to complete this research work but let me submit that omissions are inadvertent and once again I record my deep felt gratitude to all those who cooperated, directly or indirectly, with me in this endeavor.

(Sandeep Jindal)
