Acknowledgement

Ph.D. is not just another degree, but it marks the culmination of very long years of academic education. It is just like climbing a high peak step by step, accompanied with bitterness, hardships, frustration, encouragement and trust, and with so many people’s kind help. When I found myself at the top enjoying the beautiful scenery, I realized that it was, in fact, teamwork that got me there. Though it will not be enough to express my gratitude in words to all those people who helped me, I would still like to give my many, many thanks sincerely to all these people.

I really feel much honored for having come across brilliant teachers who not only taught me the academic subjects but also touched the deepest chords of my heart. I would like to convey my genuine appreciation and heart-felt gratitude to all of them.
