List of Figures

Figure 1: FDI during the years ................................................................................................. 6
Figure 2: Inflation target and Change in CPI, YoY ................................................................. 17
Figure 3: Post Crisis Growth Slowdown .................................................................................. 32
Figure 4: Structural and Cyclical Elements ............................................................................ 33
Figure 5: Impact on commodity exporters ............................................................................. 34
Figure 6: Impact on export-oriented EMs ............................................................................... 34
Figure 7: Tightening global financial conditions .................................................................. 35
Figure 8: Explains the occurrence of asset price bubbles ...................................................... 69
Figure 9: Capital Flows to Emerging Markets ....................................................................... 76
Figure 10: Exchange Rate Regimes with various implications .............................................. 78

Impact of FD, FV, FS AND FSI
Figure 11: Normality Statistics of Residuals ......................................................................... 156

Impact of MC, BD, BM, PVT, INT, HH on FD
Figure 12: Normality Statistics of the Residuals .................................................................. 161
Figure 13: Normality Statistics of Residuals (Dummy Variables) ......................................... 166

Impact of INF, GB, CAD, EXT, REER, RES, SHT and LTD on FV
Figure 14: Normality Statistics of Residuals ......................................................................... 173

Impact of NPL, CA, CRAR, LR, ROA, ROE, SR, BR, and H on FS
Figure 15: Normality Statistics of Residuals ......................................................................... 175

Impact of Capital Flows, Exchange Rates, GDP and Stock Prices on Financial Stability Index
Figure 16: Normality Statistics of Residuals ......................................................................... 187
Figure 17: Normality Statistics of Residuals (Dummy Variables) ......................................... 190

Impact of capital flows, exchange rates, GDP and stock prices on Financial Development Index
Figure 18: Normality Statistics of the residuals.................................................................... 197
Figure 19: Normality Statistics of Residuals (Dummy Variables) ......................................... 201

Impact of Capital Flows, Exchange Rates, GDP and Stock Prices on Financial Vulnerability Index
Figure 20: Normality Statistics of the residuals.................................................................... 208

Impact of Capital Flows, Stock Prices, Exchange Rates and GDP on Financial Soundness Index
Figure 21: Normality Statistics of the residuals.................................................................... 214
Figure 22: Normality Statistics of residuals (Dummy variables) ........................................... 217
