ABSTRACT

CHAPTERS

Pages

1 Introduction	1
1.1 Fuzzy sets	1
1.2 Review of Literature	3
1.3 Outline of Thesis	5
1.4 Basic Concepts in Fuzzy Topological Spaces	8
2 Invertible fuzzy topological spaces	20
2.1 Invertible fuzzy topological spaces	20
2.2 Properties and Example	21
2.3 Characterizations of invertible fuzzy topological spaces .	23
3 Upper and lower α (β, semi and pre, resp.)-irresolute fuzzy multifunctions	27
3.1 Characterizations fuzzy multifunctions	27
3.2 Preservations and some other Properties	44

3.3	Upper and lower α (β , semi and pre, resp.) continuous fuzzy multifunctions	54
3.4	Mutual relationships and relations with other existing fuzzy multifunctions	59
4	Fuzzy almost (semi and pre, resp.) α-irresolute functions	68
4.1	Definitions and Examples	68
4.2	Properties	81
4.3	Characterizations	87
5	Somewhat fuzzy pre (semi and almost , resp.) α-irresolute functions	94
5.1	Properties of somewhat fuzzy pre (semi and almost, resp.) α -irresolute functions	94
5.2	Interrelationship	106
5.3	Strongly somewhat fuzzy pre (semi and β , resp.)-open functions	109
6	The complementary fuzzy topology	114
6.1	Definitions	114
6.2	Basic Properties	115
7	Pre α-irresolute and somewhat pre α-irresolute functions	121
7.1	Pre α -irresolute functions	121
7.2	Somewhat pre α -irresolute functions	135
