ACKNOWLEDGEMENTS

My world of knowledge as a student of Geropsychology, often left me questioning my adequacy in dealing with the elderly and their problems. Particularly, I was concerned about changes in cognitive functions e.g., memory, the intricacies of its store and retrieval and its fading with age. The researches on the Facets of Memory, their processes and their associated factors, were amazing.

I became aware more and more that it was going to be difficult to attempt to gain a comprehensive understanding of them. At the same time I was attracted to them. I do not know if I would succeed, but with the grace of the Lord above and guidance from my teachers the task may become less burdensome.

I began this journey by registering with Dr. D. Jamuna, Asst. Professor, Department of Psychology, S V University, Tirupati, my teacher, who inspired and led me into the field. I like to acknowledge her for being a 'guide' in the true sense of the word—perennially encouraging, evaluating, supporting and sharing. Her guidance was invaluable in inculcating a scientific attitude in me. She has been a strong influence in my life, an inspiring role model at all times.

No language is adequate to express my utmost gratitude to my distinguished teacher, Prof. P.V. Ramamurti, Hon. Director, Center for Research on Ageing, for giving his valuable time to share some important thoughts on this topic of research and for being approachable, gratefully appreciate his support and encouragement throughout the study.

My sincere thanks are due to Prof K. Sivasankara Reddy, Prof. I.V. Ramana Reddy, former Heads and Dr. B. Nagarathnamma, present Head, Department of Psychology, S V University, Tirupati, for providing facilities and extending necessary help to carry out this doctoral work.

I would also like to acknowledge Prof. Sujatha Ramamurti, Professor of Foods & Nutrition and Dr. D. Gunasekar, Associate Professor, Department of Chemistry, S.V University for their constant encouragement and support. My thanks are due to Dr. L.K. Reddy, Asst. Professor, Dept. of Education for his kind suggestions.
I am thankful to Ms Sudha Rani, Ms V.G Mamatha and Mr P V Reddy for their constant help.

I owe my gratitude to my beloved parents and younger sister Ms. Usha and other family members for their encouragement, moral support and unstinted help during the course of this investigation.

My thanks to Prof. V K Reddy, Department of Economics, S V University, Tirupati, for helping me to carry out Statistical analysis for the data.

A tolerant and supportive family is perhaps the most important pre requisite for any such venture. It is with a sense of fulfillment and joy that I record the loving support of my beloved husband, Mr D Prakash, who by his ready and unflinching support lightened my burden. I thank my in-laws and Mrs A Lalitha for their kind cooperation.

Special thanks are due to Mr E Nagendra Babu, Office Assistant, Center for Research on Ageing, Dept. of Psychology, S V University, Tirupati for his help in various ways and Mr Karthik of Nichtin Karthik Xerox in Tirupati for his patience and perseverance in typing the draft.

Finally, my gratitude and acknowledgements to the elderly, who have helped me willingly by participating in the study, and giving me their valuable time. They evinced keen interest in my endeavour and offered me full cooperation.

Our elderly have given us their wisdom acted as involved facilitators in our growth. It is a privilege to serve them. I dedicate this study to their well being and pray to Almighty to give his blessings to them.

K. Lalitha
