DEDICATED

TO MY

FAMILY
ACKNOWLEDGEMENT

I would like to take this opportunity to express my sincere and deepest gratitude to my research advisor, Dr. A. Nagendran for his encouragement, guidance, advices and inspiration throughout my entire graduate career. He shaped the direction of the research project and the physical form of the thesis as it is presented today. His immense knowledge has helped me overcome many difficulties and rationalized many of the “perplexing” observations encountered in this study. I have exceedingly benefited from his vast knowledge, lasting enthusiasm, and exceptional personality. My special thanks go to Dr. P. Perumal, Principal, Thiru. V. Ka. Arts and Science College, Thiruvarur, who introduced my mentor to me. I would also like to thank the members of my advisory committee, Dr. S. Ravichandran, Senior Scientist, CECRI, Mrs. G. Vasanthi, Head of the Department, PG & Research Department of Chemistry and Dr. A. John Rethinam for their constant support.

I would especially acknowledge the Principal of Alagappa Government Arts College Dr. K. Kudalingam, who caters all infrastructure facilities to carry out this research. Thanks are also extended to all the faculty members of PG and Research Department of Chemistry for their constant assistance and cooperativeness over these past years.

Special thanks go to Professor. D. Rana and Professor. T. Matsuura, Department of Chemical and Biological Engineering, Industrial Membrane Research Institute, University of Ottawa, Canada for their contribution, which is truly helpful for completing this thesis smoothly.

I would like to give my special gratitude to Dr. S. Ravichandran, Senior Scientist CECRI for providing me technical assistance during proton conductivity and methanol permeability measurement studies.
Many valuable discussions with my co-research scholars, Dr. S. Neelakandan, Dr. P. Kanagaraj and M. Sri Abirami Saraswathi in Polymeric Materials Research Lab, PG & Research Department of Chemistry, contributed to my success. I am grateful to each of them for their patience and for sharing their knowledge with me.

My indebtedness also goes to all friends especially Dr. R. Balaji, Senior Scientist (ARCI IIT-M) and Dr. S. Sundar Pethaiah, Senior Scientist (Gashubin Technology) that had supported me in many ways during my PhD studies.

I would also like to thank my entire family for their love and assistance that have aided me to this point of my life.

(A. MUTHUMEENAL)
