The research work embodied in this dissertation has been carried out in the School of Life Sciences, Jawaharlal Nehru University, New Delhi. This work is original and has not been submitted in part or full for any other degree or diploma of any University.

A. SRINIVASAN

P.C. KESAVAN
Supervisor

P.N. SRIVASTAVA
Dean

School of Life Sciences
Jawaharlal Nehru University
New Delhi.
I gladly seize upon this opportunity to express my indebtedness and gratitude to Dr. P.C. Kesavan for inspiration, encouragement and criticism of the work. His scientific hospitality has provided a constant stimulus to me. To Professor Sivatosh Mookerjee F.N.A. and Professor P.N. Srivastava F.N.A., Dean, School of Life Sciences, I offer my gratitude for their generous encouragement and facilities provided during the course of the work.

I wish to express my sincere thanks to Dr. T.J. Pandian of Madurai University and Dr. S.I. Mehta of I.A.R.I. for so very willingly providing Bomb calorimeter and gel scanning facilities respectively. Likewise, I acknowledge the help of Dr. S. Mathavan in estimating the calorific content and Dr. K. Dharmalingam of Tufts University, U.S.A. for helpful suggestions.

My cordial thanks are due to Sreedharan Kartha, Selvam, Balachandran, Suresh Abraham, Audilakshmi, Jayakumar, Sihag, and Bhardwaj who stood by my side as and when help was needed. Acknowledgement must be made of the contributions of Avtar, Lakshmi Chand and Prem Singh who by their hands have had a major share in the executing phase of the work. Mr. Ram Prasad deserves special thanks for typing, as does Mr. R.N. Saini for art and photographic work.
