ACKNOWLEDGEMENTS

First of all, I would like to thank Almighty for granting me perseverance. Words are often less to reveal one’s deep regards. It is my proud privilege to express my sincere gratitude to my respected supervisor, Dr. T.D. Narang, Professor, Department of Mathematics, Guru Nanak Dev University, Amritsar, whose expert guidance, meticulous efforts, stimulating suggestions, inspiring encouragement, constructive criticism, invaluable co-operation and unflinching support from the preliminary to the concluding level enabled me to develop an understanding of the subject. His perpetual energy and enthusiasm in research has motivated all his students, including me. In addition, he is always accessible and willing to help his students.

I am thankful to UGC for Major Research Project Fellowship, which was awarded to me for the period 2005–2007 and was crucial to the successful completion of this project.

I would like to extend my sincere appreciation to thank all teachers and members of the Department of Mathematics, for their formal and informal discussions, suggestions and help during the project.

I am also thankful to Ms. Sangeeta and Ms. Shavetambry Tejpal for discussions and help during the project.

My deepest gratitude goes to my family for their patience, unflagging love and support. Without them this work would never have come into existence. I am indebted to my father, Sh. Subash Chandok, for his care, love, support and efforts to provide the best possible environment for me to grow up. I have no suitable words for my mother, Smt. Sangeeta Chandok, that can fully describe her everlasting love to me. This project was not possible if my sister, Geetika, had not insisted me to join UGC Major Research Project Fellowship. She is younger to me but have always been my best friend, supporter and counselor.

I am also thankful to Dr. Asha Narang for her constant encouragement and motivation during the project.

Lastly, I offer my regards to all those who supported me in any respect during the completion of the project.

Sumit Chandok
