
Chapters	CONTENTS	Page No.
-----------------	-----------------	-----------------

CHAPTER - I

1. Introduction	1
-----------------	----------

CHAPTER - II

2. Literature Review	6
----------------------	----------

2.1. Green chemistry

2.2. Nanotechnology and nanoparticles

2.3. Metal/Metal oxide nanoparticles (M/M-O NPs)

2.3.1. Silver

2.3.2. Titanium dioxide

2.3.3. Copper oxide

2.3.4. Zinc oxide

2.3.5. Manganese oxide

2.4. Nanocomposite

2.4.1. Types of nanocomposite

2.4.2. Physical synthesis

2.4.3. Chemical synthesis

2.5. Clay

2.5.1. Types of clays

2.5.2. Bentonite

2.5.3. Sodium bentonite

2.5.4. Properties of sodium bentonite

2.5.5. Applications of sodium bentonite

2.6. Ionic liquid

2.6.1. Introduction of Ionic liquid

2.6.2. Properties of ionic liquid

2.6.3. Applications of ionic liquid

References

Aim and Scope **28**

CHAPTER - III

3. Experimental details **31**

3.1. Materials

3.2. Methods

3.2.1. Synthesis of Mn₃O₄/bent nanocomposite

3.2.2. Synthesis of Ag/TiO₂/bent nanocomposite with and without ionic liquid

3.2.3. Synthesis of Ag/CuO/bent nanocomposite with and without ionic liquid

3.2.4. Synthesis of Ag/ZnO/bent nanocomposite with and without ionic liquid

3.2.5. Synthesis of Ag/Mn₃O₄/bent nanocomposite with and without ionic liquid

3.3. Characterization techniques

3.4. Antimicrobial assessment

3.5. Cytotoxicity studies

4. Synthesis of Mn₃O₄/bent nanocomposite

4.1. Introduction

4.2. Results and Discussion

4.2.1. Intercalation process of Mn₃O₄/bent nanoparticles intercalated into bentonite

4.2.2. X-ray diffraction analysis

4.2.3. Fourier transforms infrared spectroscopy analysis

4.2.4. Scanning electron microscope analysis with energy dispersive X-ray analysis

4.2.5. Transmittance electron microscope analysis

4.2.6. Antimicrobial activity

4.3. Conclusion

5. Synthesis of Ag/TiO₂/bent nanocomposite with and without ionic liquid

5.1. Introduction

5.2. Results and Discussion

5.2.1. Intercalation process of Ag/TiO₂ nanoparticles intercalated into bentonite

5.2.2. X-ray diffraction analysis

5.2.3. X-ray photoelectron spectroscopy

5.2.4. Scanning electron microscope analysis with Energy dispersive X-ray analysis

5.2.5. Transmittance electron microscope analysis

5.2.6. Brunauer-Emmett-Teller analysis

5.2.7. Particle size analysis

5.2.8. Fourier transforms infrared spectroscopy analysis

5.2.9. UV-Visible diffuse Reflectance spectroscopy

5.2.10. Antibacterial activity

5.2.11. Cytotoxicity studies

5.3. Conclusion

6. Synthesis of Ag/CuO/bent nanocomposite with and without ionic liquid

6.1. Introduction

6.2. Results and Discussion

6.2.1. Intercalation process of Ag/CuO nanoparticles intercalated into bentonite

6.2.2. X-ray diffraction analysis

6.2.3. X-ray photoelectron spectroscopy

6.2.4. Scanning electron microscope analysis

6.2.5. Energy dispersive X-ray analysis

6.2.6. Transmittance electron microscope analysis

6.2.7. Fourier transforms infrared spectroscopy analysis

6.2.8. UV-Visible diffuse reflectance spectroscopy

6.2.9. Antibacterial activity

6.2.10. Cytotoxicity studies

6.3. Conclusion

7. Synthesis of Ag/ZnO/bent nanocomposite with and without ionic liquid

7.1. Introduction**7.2. Results and Discussion**

7.2.1. Intercalation process of Ag/ZnO nanoparticles intercalated into bentonite

7.2.2. X-ray diffraction analysis

7.2.3. X-ray photoelectron spectroscopy

7.2.4. Scanning electron microscope analysis

7.2.5. Transmittance electron microscope analysis

7.2.6. Energy dispersive X-ray analysis

7.2.7. Fourier transforms infrared spectroscopy analysis

7.2.8. UV-Visible diffuse reflectance spectroscopy

7.2.9. Antibacterial activity

7.2.10. Cytotoxicity studies

7.3. Conclusion

8. Synthesis of Ag/Mn₃O₄/bent nanocomposite with and without ionic liquid

8.1. Introduction**8.2. Results and Discussion**

8.2.1. Intercalation process of Ag/ZnO nanoparticles intercalated into bentonite

8.2.2. X-ray diffraction analysis

8.2.3. X-ray photoelectron spectroscopy

8.2.4. Scanning electron microscope analysis with energy dispersive X-ray analysis

8.2.5. Transmittance electron microscope analysis

8.2.6. Brunauer-Emmett-Teller analysis

8.2.7. Fourier transforms infrared spectroscopy analysis

8.2.8. UV-Visible diffuse reflectance spectroscopy

8.2.9. Antibacterial activity

8.2.10. Cytotoxicity studies

8.3. Conclusion
